A NOTE TO USERS

Revisions to Data:

The monthly estimates contained in Table 86 on "Department Store Sales and Stocks" have been modified from January 1964 onwards.

The revised data for the period not covered by the Review are published in the D.B.S. report entitled "Department Store Sales and Stocks", Catalogue No. 63-002, December 1966 issue.

Annual Supplement to the Canadian Statistical Review:

The *sixth* volume of the Annual Supplement (1966 edition) will appear in print shortly and will supersede Volume V distributed last year. It will contain the historical record and the latest revised figures adjusted and not adjusted for seasonality of all the series appearing in the "S" section of the Review.

Other Information:

Reprints of the following feature articles entitled "Problems in Measuring Quality Changes in Price Indexes" (May issue) and "Surveys of Family Expenditure" (June issue) are available on request, free of charge from the Current Business Indicators and Data Bank Section, Economic Accounts Branch, D.B.S.

Annual Subscription: $5.00 — Single copy: 50c.

This review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications may be ordered from Publications Distribution, Dominion Bureau of Statistics, Ottawa, Ont. or from the Queen's Printer, Hull, Que., and remittances made payable to the Receiver General of Canada.

NATIONAL ACCOUNTS, INCOME AND EXPENDITURE
FIRST QUARTER, 1967

Introductory Review

In the first quarter of 1967 Gross National Product at market prices reached the $60 billion mark, advancing by 1.7 per cent from the fourth quarter of 1966. With prices rising by about 1 per cent, approximately one-third of this increase represented a gain in real terms. Excluding accrued net income of farm operators,[1] GNP advanced by about 2 per cent in current dollars.

Real Gross Domestic Product at factor cost by industry of origin, an alternative but conceptually somewhat different measure of economic production, shows a small decline from the fourth quarter. Part of the difference between the two constant dollar series is due to unusual movements which resulted in a higher rate of increase on a national basis than on a domestic basis. A further part of this difference results from the absence of a formal balance between the two aggregates.

For the past four successive quarters the increases in the value of GNP have been about 2 per cent in the second quarter of 1966, less than 1 per cent in the third quarter when strikes were a major factor, 2 per cent in the fourth and a little less than 2 per cent in the first quarter of 1967. In constant dollar terms these gains have been moderate – 1 per cent in the second quarter, minus one-half of one per cent in the third, 1 per cent in the fourth and about half of one per cent in the present quarter. Therefore, price advances throughout this period have continued to be significant although there is some evidence of a moderating trend, notably in the area of food prices which flattened in the fourth quarter of 1966 and actually declined in the first quarter of 1967. Increasing costs continued to exert upward pressures on non-food prices on the one hand, and continuing strong demand conditions within certain areas of the domestic sector of the economy, especially services, probably were still another factor in these higher prices.

Within the domestic sector overall increases in demand were moderate. Outlays by persons advanced by about $560 million, while increases in investment by business for plant and equipment and by governments for goods and services reinforced these gains in domestic demand. Offsets to these increases in final outlays were in the areas of investment in new residential construction, which showed a decline for the third successive quarter, and in non-farm business inventory accumulation. The largest advance in final demand in the first quarter occurred in the external sector, where exports of goods and services increased by over one billion dollars, seasonally adjusted at annual rates.

Outlays by the personal sector rose by 1½ per cent in the first quarter compared with a 2 per cent advance in the fourth quarter of 1966. However, with prices rising by somewhat less in the first quarter than in the preceding quarter, personal outlays in real terms increased by about 1 per cent in both the fourth and first quarters. As in the preceding quarter, increased demand by the personal sector was confined to non-durable goods, which rose moderately, and to services which increased by 3 per cent. The continued decline in outlays on durable goods was almost entirely due to significantly decreased expenditures on new motor vehicles. Outlays by the business sector on plant and equipment rose moderately, with most of the advance being attributable to increased outlays on machinery and equipment. Although investment in new residential construction declined for the third successive quarter, there was some increase in starts of multiple units from their very low fourth quarter level, probably reflecting the somewhat easier conditions in mortgage funds.

There was a sizeable cut-back in the rate of non-farm business inventory investment in the first quarter of 1967. This first quarter adjustment to stocks paralleled inventory movements in the United States, but in terms of its impact on GNP these inventory movements were much less significant in Canada. The cut-back was most marked in the manufacturing industries where a fractional liquidation of stocks in the first quarter took place as compared with an inventory accumulation of approximately $560 million in the fourth quarter of 1966. Wholesalers and retailers continued to accumulate inventories, although their rates of investment might be characterized as modest.

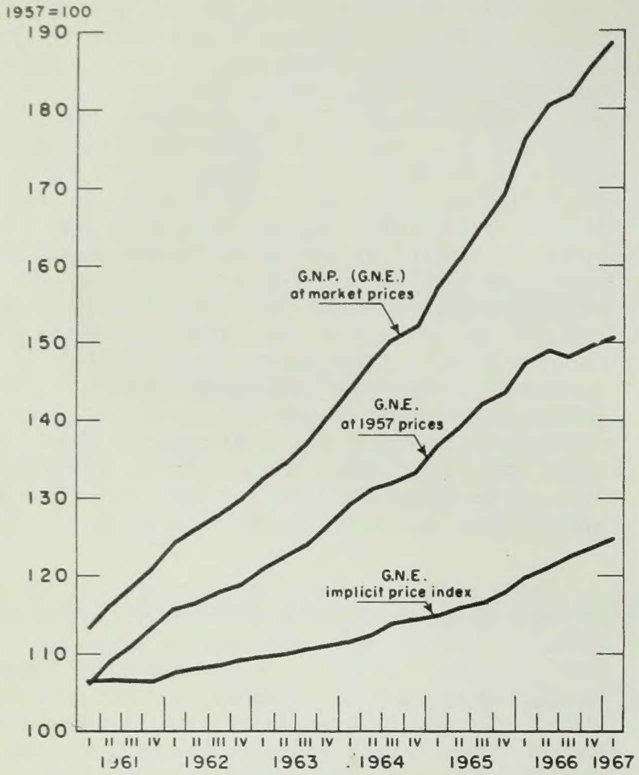
The sharp increase in demand for Canadian goods and services by the external sector during the first quarter has already been mentioned. On a seasonally adjusted basis, merchandise exports rose by over $950 million at annual rates. Trade data classified by country of destination suggest that a little better than half of this increase in demand for Canadian exports was attributable to countries other than the United Kingdom and the United States, each of the latter two countries showing increases of around $200 million. Increases in exports to Asian countries were particularly notable, and probably were in part due to the rapid growth in economic activity now being experienced by Japan. Imports of merchandise also increased, but by a lesser amount than merchandise exports. These transactions on the merchandise account, together with a significant reduction in the current account deficit on services, largely owing to a sharp decline in payments of interest and dividends to non-residents, resulted in the current account import balance.

Turning to the income side, labour income continued to advance strongly, increasing by about 3 per cent between the fourth and the first quarters. However, mixed trends were evident as between the

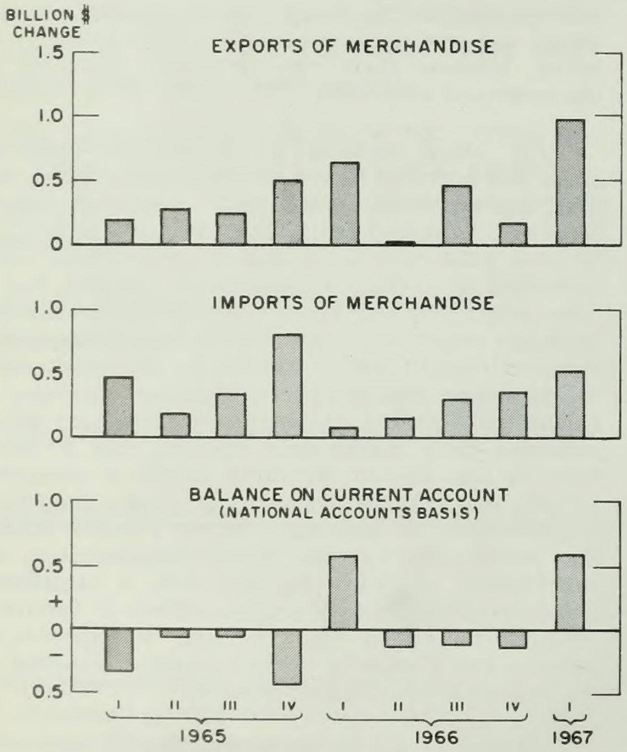
---

[1] Estimates of crop production are based on acreage intentions and ten year average yields. On these assumptions the value of the 1967 crop would be $1.2 billion compared with the record crop of $1.6 billion in 1966. Seasonally adjusted quarterly data are obtained by dividing the estimated annual crop by four.

G.N.P. rose by 1.7 per cent in the first quarter. PRICE advances accounted for two-thirds of this gain.

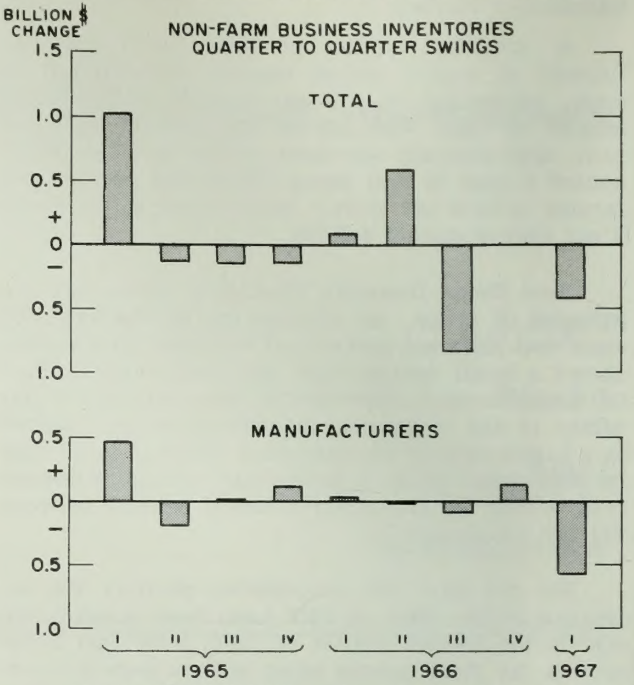


MERCHANDISE EXPORTS rose strongly in the first quarter. The over-all deficit on CURRENT ACCOUNT declined significantly.

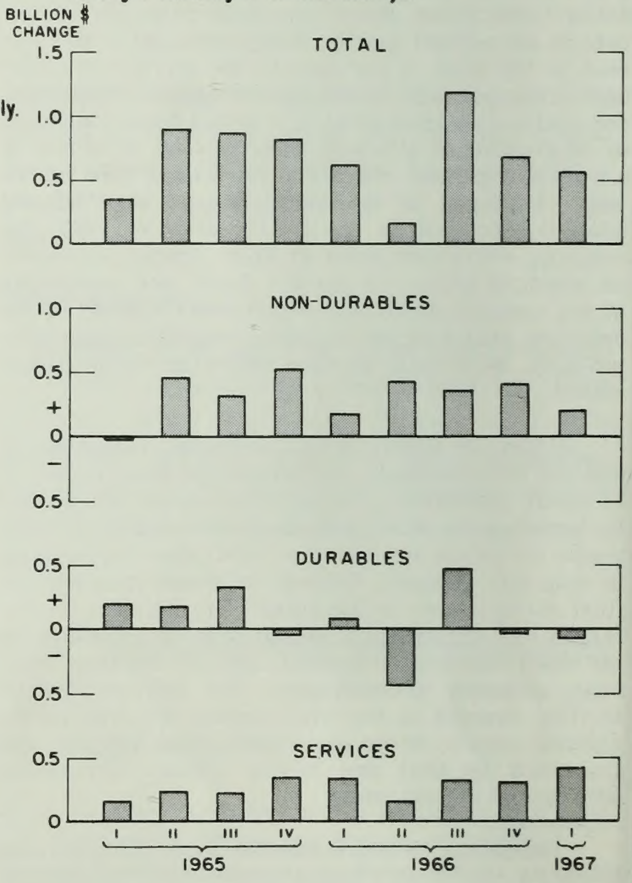


ALL DATA SEASONALLY ADJUSTED, AT ANNUAL RATES

There was a marked stock adjustment in the first quarter wholly due to a run-down in MANUFACTURERS' INVENTORIES.



CONSUMER SPENDING continued to rise with most of the strength showing in service outlays.



goods and the service producing industries. Monthly data for the goods producing industries, where payrolls had been advancing strongly, levelled in terms of month-to-month movements in the first quarter. On the other hand, service producing industries continued to show strong month-to-month gains.

The very sharp increase in military pay and allowances was associated with the complete overhaul of the pay structure of the armed services, combined with general pay increases averaging 9.8 per cent announced in late 1966.

Corporation profits declined sharply from the fourth quarter level, partly because of such special factors as high subsidy payments to the railways in the fourth quarter of 1966, and increased capital consumption allowances taken by the corporate sector in the first quarter of 1967. However, a portion of the profit decline probably was associated with the somewhat slower rate of economic growth.

Price Movements

As previously mentioned, with prices advancing by about 1 per cent between the fourth and first quarters, the increase in GNP of 1.7 per cent was reduced to 0.6 per cent in real terms.

The price component of consumer expenditure advanced by 0.5 per cent, somewhat less than in most of the recent quarters. A dominant factor in price movements at the consumer level was the decline of over 1 per cent in food prices, discounting seasonality. Prices of commodities other than food advanced by 0.6 per cent while prices of services rose by 1.3 per cent.

Within non-durables other than food, price increases were fairly widespread. Prices of yard goods and of newspapers and magazines rose sharply while quarter-to-quarter increases of over 1 per cent were observed in clothing, household supplies, and auto parts and accessories. On average, prices of durable goods showed little change. However, prices of furniture rose by about 1 per cent while small increases in other categories, such as household appliances, offset minor declines in categories such as motor vehicles.

The price component of service outlays advanced by over 1 per cent, with notable increases occurring in personal services and personal care, 2½ per cent, and purchased transportation, 3½ per cent.

Prices of capital goods advanced by approximately 1 per cent. Machinery prices rose by somewhat more than those prices associated with residential and non-residential building construction.

The price components of both exports and imports of goods and services showed little change.

Implicit Price Indexes — Percentage Change from the Preceding Quarter

(Based on seasonally adjusted data)

	1966			1967
	2 Q	3 Q	4 Q	1 Q
Personal expenditure	1.1	0.5[1]	0.9	0.5
Non-durable goods	1.0	0.5[1]	0.5	- 0.1
Durable goods	1.0	- 0.3[1]	1.3	0.3
Total goods	1.4	0.4[1]	0.8	—
Of which: Food	1.1	0.5	—	- 1.2
Goods other than food	1.2	0.3[1]	1.2	0.6
Services, excluding net expenditure abroad	1.0	1.0	1.0	1.3
Government expenditure	0.6[1]	1.5[1]	2.1[1]	3.2[2]
Business gross fixed capital formation	1.0	0.7	1.5	1.0
New residential construction	0.9	1.1	2.3	0.6
New non-residential construction	1.5	1.1	1.5	0.9
New machinery and equipment	0.7	0.5	1.4	1.5
Exports	0.9	1.7[1]	0.6[1]	0.1
Imports	0.3	0.6	1.0	0.2
Gross national expenditure	1.0	1.2	0.9	1.1
(Base-weighted price index of gross national expenditure)	1.6	1.2	1.0	1.0

[1] The implicit price indexes in some quarters may not provide reasonable measures of price change as a result of marked quarter-to-quarter changes in expenditure patterns. Such was the case notably in the third quarter of 1966. The quarter-to-quarter changes footnoted in the table are based on price indexes in which the effect of changes in expenditure patterns has been discounted.

[2] Fourth to first quarter changes in this component are not necessarily analytically significant.

The Components of Demand

Consumer Expenditure

Personal expenditure reached a level of $36.5 billion, seasonally adjusted at annual rates, an increase of 1½ per cent from the fourth quarter as compared with a 2 per cent advance in the preceding quarter. In real terms the advance in consumer outlays was the same for both quarters, i.e. 1 per cent. The increase in the value of outlays was distributed unequally among the major categories as follows: an increase of slightly more than 1 per cent in non-durables, the smallest rise in a year; a further decline of nearly 2 per cent in durables following a 1 per cent drop in the previous quarter; and a 3 per cent increase in services, the largest quarterly increase in this component in the current expansion.

Personal income rose by 3 per cent, but with personal direct taxes increasing by 14 per cent the advance in personal disposable income was only 1 per cent. With consumer outlays rising by more than 1 per cent, personal net saving declined fractionally.

Within the non-durables category of consumer expenditure there was an uneven pattern of expenditures. Food and clothing, the two largest components, rose by 2 and 1½ per cent respectively; tobacco increased by 2½ per cent, while expenditure on energy sources (fuel, electricity and gas) rose by 3 per cent. Spending on gasoline, oil and grease, and on auto parts and accessories rose by 4½ per cent and 4 per cent respectively, while declines of 4 and 3 per cent were registered respectively in alcoholic beverages and in soaps and cleaning supplies. A large increase, more than 7 per cent, occurred in newspapers, magazines and books, a significant part of this rise being attributable to price advances.

Among durable goods outlays, a 10½ per cent decline in new car purchases more than offset increases in other items. The decline in trade-ins paralleled that of new car purchases, while purchases of used cars decreased somewhat less. Consequently, outlays by the personal sector on new and used motor vehicles declined by 7 per cent. The only other item to show a decline was furniture, where purchases dropped by almost 5 per cent. Increases were shown in home furnishings, 4½ per cent, appliances and radios, 3 per cent, and jewellery and watches, 2½ per cent.

All components of the services category showed increases from the fourth quarter; with one exception, all these were within the range of 1 to 3 per cent. Increases of about 1 per cent were shown in personal services and user-operated transportation, while rises of between 2 and 2½ per cent were registered in several series – personal care, recreation, medical care, financial and miscellaneous services, and shelter; household operations showed an increase of 3 per cent. Purchased transportation rose by 10½ per cent from the fourth quarter, but this was partially due to a recovery from a depressed fourth quarter owing to the Air Canada strike in November, and to fare increases in public transit and inter-city bus facilities.

Business Gross Fixed Capital Formation

A rise of just over one-half of one per cent in spending on business gross fixed capital formation carried the level of this aggregate to an annual rate of $12.6 billion in the first quarter of 1967. A sharp decline of 8½ per cent in outlays on new residential construction dampened the increase of 3½ per cent in expenditures on machinery and equipment. Outlays on new non-residential construction rose fractionally.

Dwellings Started, Completed and Under Construction

(Number of units, seasonally adjusted at annual rates)

Type and period	Starts	Completions	Under construction
	Urban areas 10,000 population and over

1 Q – 1967	121,600	117,600	[2]

[1] End of period.

[2] Not available.

The decline in housing outlays in the second half of 1966 continued into the first quarter of 1967. The estimated $1.9 billion of new residential construction put in place represented a drop of some 8½ per cent from the fourth quarter. Seasonally adjusted figures for dwelling units indicated a very marked fall in completions of both single units and apartment and other multiple dwellings, and a drop in starts of single detached units which offset an increase in the number of starts of multiple units.

Preliminary and incomplete data for the second quarter indicate that there was a sharp rise in the number of starts of both single and multiple dwellings as between March and May. These trends partly reflect a sharp increase in mortgage loan approvals for rented dwellings in March, even prior to the downward adjustment in NHA maximum interest rate, and also the fact that loan approvals under the direct CMHC spring lending program started on April 1.

Spending by the business sector on new non-residential building and engineering construction rose an estimated 1½ per cent to reach a level of $5.1 billion.

Outlays on new machinery and equipment increased by about 3½ per cent to $5.6 billion. Preliminary data suggest that most of this increase was supplied from domestic sources.

Non-farm Business Inventories

The first quarter of 1967 showed a marked slowdown in the rate at which the non-farm business sector was accumulating inventories. Discounting seasonal variations, the rate of accumulation in the first quarter was $170 million compared with $580 million in the fourth quarter of 1966.

The following table shows the value of physical change in non-farm business inventories in the fourth quarter of 1966 and the first quarter of 1967 by industry.

Value of Physical Change in Non-farm Business Inventories

(Seasonally adjusted at annual rates)

	4 Q 1966	1 Q 1967
	millions of dollars	
Manufacturing	556	– 16
Durables	316	4
Non-durables	240	– 20
Wholesale	76	196
Retail	– 160	96
"Other" industries	108	– 104
Grand totals	**580**	**172**

Manufacturers' total stocks owned showed a slight liquidation, mainly because of non-durables, where small accumulations in the food, rubber, textile and clothing industries were more than offset by reductions in stocks held by the tobacco, leather, paper, petroleum and chemicals producing industries. Mixed and offsetting movements in the stocks of durable goods resulted in virtually no inventory accumulation.

The major part of the inventory accumulation in the present quarter occurred in the wholesale trades, where it was in both durable and non-durable goods with the exception of groceries which showed a fractional depletion in stocks.

Inventories at the retail level showed a moderate accumulation. This was a product of offsetting movements, a build-up which was evident in most of the trades was greatly offset by a large liquidation in the stocks of motor vehicle dealers, who continued to deplete their inventories but at a much higher rate than in the previous quarter.

Exports and Imports of Goods and Services[2]

Exports of goods and services rose sharply in the first quarter of 1967, and at a seasonally adjusted annual rate of $14.3 billion were nearly 8 per cent higher than in the preceding quarter. This gain represented one of the strongest quarter-to-quarter advances in the current expansion. Imports of goods and services rose by 3 per cent from the preceding quarter.

---

[2] The Balance of Payments report for the first quarter of 1967 (DBS 67-001) carries this important comment:

> Some relevant information on the basic trade statistics which became available recently has not yet been used to revise the balance of payments estimate for 1966. In conformity with the usual practice, revisions to 1966 estimates will be carried out and published in the report for the second quarter of 1967. Revisions in the amount of nearly $60 million consisting to a large extent of automotive products exported to Latin American markets in 1966 have come to light, as also has a developing lag during the year in the receipt by DBS of import documents from an important port. The full impact upon 1966 of the retardation on the imports total is not known but is believed to be substantial. Notwithstanding the offsetting nature of these factors, their net effect would likely be to significantly reduce the merchandise trade surplus for 1966.

Merchandise exports were at a rate of $11.6 billion in the first quarter, about 9½ per cent above the level of the preceding quarter. Gains were recorded in fish, newsprint, lumber, wood pulp, metals, crude petroleum and natural gas. Farm and non-farm machinery and asbestos showed no change. Exports of wheat and iron ore were lower.

Data are not yet available to identify import commodity changes corrected for the usual seasonal movements. Imports of goods rose overall by 5 per cent.

On a seasonally adjusted basis, receipts from services rose 2 per cent, while payments by Canadians to non-residents fell about 2 per cent. Increased earnings from tourist and travel and from freight and shipping accounted for almost all of the rise in receipts in the first quarter of 1967. Outpayments of interest and dividends to parent companies by Canadian subsidiaries showed a sharp drop from their unusually high fourth quarter level. This was the main factor in the fall in service payments.

Exports and Imports of Goods and Services — Quarter-to-quarter Percentage Change

(Seasonally adjusted data)

	Goods		Services		Total	
	Exports	Imports	Exports	Imports	Exports	Imports
1966 — 1st Q	6.9	0.9	6.7	3.6	6.9	1.7
2nd Q	0.3	1.6	1.1	0.8	0.4	1.3
3rd Q	4.7	3.2	2.0	8.3	4.2	4.6
4th Q	1.7	3.6	0.6	- 0.7	1.5	2.3
1967 — 1st Q	9.3	5.0	2.0	- 1.8	7.8	3.0

The consequence of these divergent movements in total payments and receipts was a narrowing of the deficit in the current account on a national accounts basis. The surplus on merchandise trade increased by $468 million, while the deficit on non-merchandise trade narrowed by $128 million (all data at seasonally adjusted annual rates). The overall deficit fell from about $1.3 billion in the fourth quarter of 1966 to about $0.7 billion in the first quarter of 1967.

The Government Sector

Seasonally adjusted at annual rates, total revenues of all governments combined (excluding inter-government transfers) increased 5 per cent to a rate of $20,556 million. The gain was concentrated in revenues from personal direct taxes and from indirect taxes. All other components of revenue declined or showed little change.

Personal direct taxes increased by 14 per cent in the quarter. Much of this rise was irregular and was associated with lower refunds, a result of a later start in processing of the 1966 income tax returns. Also, part of the increase at the federal level can be attributed to the doubling of the maximum old age security tax on personal income from $120 per year to $240 per year imposed at the beginning of the year. The impact of these changes was entirely borne by individuals whose taxable income was in excess of $3,000 per year.

Revenues from indirect taxes also increased sharply, reflecting higher rates. At the federal level, the sales tax rate was raised to 12 per cent from 11 per cent, effective January 1, while higher revenues from property taxes accounted for part of the gain at the provincial-municipal level.

Total expenditures by all governments combined remained almost unchanged during the quarter although there were divergent movements as between the levels of government. Provincial-municipal expenditures rose by 2½ per cent. mostly due to higher outlays on goods and services. Total expenditures of the federal government declined sharply, reflecting in large part a decrease in subsidy payments from the irregularly high level of the fourth quarter. Federal outlays on goods and services also declined. Offsetting these declines somewhat were higher transfer payments to persons, caused by the introduction of the guaranteed minimum monthly income supplement to old age security recipients and by a further lowering of the age requirement for old age security pensions.

With total revenues increasing by 5 per cent and little change in expenditures, a surplus of $1,032 million, on a national accounts basis and seasonally adjusted at annual rates, was registered for all governments combined (inclusive of Canada and Quebec pension plans) compared with a deficit of

$52 million in the fourth quarter. Most of the improvement came at the federal level, as the federal government moved from a deficit of $364 million in the previous quarter to a surplus of $464 million. However, much of this improvement was due to irregular movements in both the revenue and expenditure series. At the provincial-municipal level the deficit narrowed from a rate of $528 million to a rate of $288 million.

The Components of Income

Labour Income

Seasonally adjusted labour income in the first quarter of 1967 increased from the fourth quarter of 1966 by about 3 per cent. This increase continued the upward trend in total wage and salary payments evident during the past year, although there was some change in the composition of the increase. The rise was 2 per cent for the goods producing industries and 3 per cent for the service producing industries.

The goods producing industries appeared to level off over the first three months of 1967, roughly at the peak of the wages and salaries paid in these industries late in the fourth quarter of 1966. In manufacturing, where the levelling began in the middle of the fourth quarter of 1966, there was only a 0.5 per cent payroll advance between the fourth and first quarters. Mining payrolls went up 3 per cent in the first quarter of 1967. Forestry and construction indicated some levelling in the first quarter. About two-thirds of the 2 per cent increase in wages and salaries for the goods producing industries was due to an increase in employment, while the other third was from increased weekly earnings.

For the service producing industries the increase in wages and salaries was around 2½ per cent for all components except government which advanced 4 per cent. If it had not been for retroactive wage adjustments in the fourth quarter 1966 and strikes in some service industries early in 1967, the first quarter increases in the service producing industries would have been well over 3 per cent.

The service producing industries continued to have month-to-month payroll increases in the first quarter of 1967. These advances resulted about equally from increased employment and increased earnings.

Corporation profits

Corporation profits (before taxes and before dividends paid to non-residents) fell to a seasonally adjusted annual rate of $4.7 billion in the first quarter of 1967, 12 per cent below the level of the previous quarter. After steadily rising since the first quarter of 1961, profits levelled off in the last quarter of 1965 and remained at that level through the first half of 1966. However, from the third quarter of 1966 to the present quarter the movement has been irregular. A large drop in the third quarter of 1966 was followed by a recovery in the fourth quarter to earlier levels, but the results for the first quarter of 1967 reveal a decline to about the level of the second quarter of 1964. Large railway subsidy payments in the fourth quarter of 1966 accounted for part of the strength of that quarter, whereas higher capital consumption allowances taken by corporations in the first quarter of 1967 had a substantial impact on the profits decline. Earnings before capital consumption allowances declined by only 5½ per cent.

The transportation, storage, and communication industry profits fell sharply due in part to irregular fourth quarter factors in these industries. Wholesale and retail trade profits declined 12 and 15 per cent respectively, while those of the service industry rose 28 per cent. Profits in the utility industry rose substantially. The finance industry had a 6 per cent drop in profits in the quarter.

Profits of the manufacturing industries fell nearly 9 per cent below their fourth quarter level. Among those industries contributing to the decline in this total were food and beverages, with a decrease of 18 per cent, paper 14 per cent, primary metals 9 per cent, and non-metallic minerals 17 per cent. The electrical products group suffered a large profits decline. These decreases were somewhat offset by a large gain in the wood industry, and moderate gains in the textile, printing, petroleum and coal, and chemical industries.

Mining industry profits advanced 15 per cent over the fourth quarter level.

Rent, Interest and Miscellaneous Investment Income

Seasonally adjusted rent, interest and miscellaneous investment income declined by nearly 1 per cent from the fourth quarter of 1966. This decline reflected lower levels of government investment income which more than offset other movements.

Accrued Net Income of Farm Operators

Accrued net income of farm operators, seasonally adjusted at annual rates, declined nearly 5 per cent to $2,030 million from the fourth quarter 1966.

The estimated value of the 1967 crop was down 23 per cent.[3] Partially offsetting the decrease in grain production were advances in livestock production and cash income from the sales of other farm products, notably tobacco.

Net income received by farm operators rose approximately 6½ per cent over the fourth quarter to $2,140 million, mainly as a result of the record high payments of the Canadian Wheat Board.

---

[3] Estimates of crop production are based on acreage intentions and ten year average yields. On these assumptions the value of the 1967 crop would be $1.2 billion compared with the record crop of $1.6 billion in 1966. Seasonally adjusted quarterly data are obtained by dividing the estimated annual crop by four.

Net Income of Non-farm Unincorporated Business

Net income of non-farm unincorporated business fell just under 3 per cent to $2,920 million from the fourth quarter of 1966. Small gains in the service industries were more than offset by declines in the other industries, mainly construction and retail trade.

Real Gross Domestic Product at Factor Cost

Production by Industry

Real gross domestic product at factor cost, less agriculture, decreased by 0.3 per cent between the fourth quarter of 1966 and the first quarter of 1967.

Manufacturing, which declined by 1½ per cent, was mainly responsible for the first quarter decrease. Manufacturing of durables fell by 2½ per cent, with most of the decrease occurring in the transportation equipment component. Manufacturing of non-durables declined by less than 1 per cent, largely because of a decrease in textile products. Although there were significant declines in many of the components of manufacturing, there were increases in some others, such as the chemical and the non-ferrous metal groups.

Trade also contributed to the decline in the first quarter. Wholesale trade shrank by 5 per cent in contrast to a 1 per cent increase in retail trade. The construction industry, which includes both public and private construction, decreased by almost 1½ per cent, mainly because of a large drop in the private residential component.

Several industries recorded increases in the first quarter. Forestry rose by almost 10½ per cent, and electric power and gas utilities increased by 3½ per cent. The finance, insurance and real estate group also rose by slightly more than 1 per cent.

Most of other major industry groupings showed only fractional changes, or were unchanged, from the fourth quarter of last year. These included the mining, transportation, storage and communication, and community, recreation, business, and personal service industries. Within these groupings, however, there were some fairly large offsetting movements.

LABOUR FORCE (More detail in Table 19)

Unemployment was appreciably higher in May with employment and total labour force also rising but more moderately. The unemployment rate was 4.3 per cent.

		total labour force	total employed	employed non-agriculture	unemployed	unemployment rate	not in the labour force
		thousands				per cent	thousands
1965	S	7,114	6,861	6,309	253	3.6	6,056
	O	7,154	6,913	6,328	241	3.4	6,045
	N	7,205	6,950	6,383	255	3.5	6,053
	D	7,260	7,004	6,452	256	3.5	6,019
1966	J	7,296	7,037	6,479	259	3.5	6,049

INDUSTRIAL PRODUCTION (More detail in Table 16)

The index of industrial production rose by 1.4 per cent in April. All principal components contributed to the gain as mining increased by 1.8%, manufacturing by 1.4% and electric power and gas utilities by 0.5%.

		total industrial production (1949=100)	manufacturing (1949=100)			(1949=100)

INCOME, EARNINGS AND HOURS (More detail in Tables 18, 34 and 35)

Total labour income increased further in March.

Total average hourly earnings in manufacturing remained constant in March despite the slight gain in the non-durable sector while the average weekly hours declined in both the durable and non-durable components of manufacturing.

		total labour income	wages and salaries in manufacturing	average hourly earnings in manufacturing: total	durables	non-durables	average weekly hours in manufacturing[1]: total	durables	non-durables

---

[1] In single dwelling the removal of the $500 winter housing bonus has disturbed the seasonal pattern. Figures are subject to revision.

EXPORTS AND IMPORTS (More detail in Tables 91 and 92)

General increases in exports and imports occurred in April. The increase in imports was affected by the arrival of an unusually heavy backlog of import documents referring to previous months' activities. – Information of the effect of the backlog upon statistics for earlier months is not yet available. –

---

[1] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

Manufacturing shipments and orders continued to decline in March against inventories which gained slightly.
Rail revenue freight loaded increased in May after a 2% drop in the previous month.
Value of cheques cashed in clearing centres picked up in April following the decreases of the previous two months.

		manufacturing, all industries

[1] Total of all series available monthly as in column 10, Table 90.

SELECTED QUARTERLY SERIES (More detail in Tables 7, 11, 69, 70, 71, 75, 90 and 104)

Gross National Product reached the $60 billion mark in the first quarter, advancing by 1.7 per cent from the fourth quarter of 1966. With prices rising by about one per cent, approximately one-third of this gain represented an increase in real terms.

		gross national product at market prices: total	gross national product at market prices: non-farm[1]	personal disposable income	corporation profits before taxes[2] (annual rates)	farm cash[4] receipts	consumer credit outstanding[3] (end of quarter)	dwelling units, all centres: started	dwelling units, all centres: completed	dwelling units, all centres: under construction thousand units, end of quarter	commercial failures

[1] Gross National Product at market prices excluding accrued net income of farm operators from farm production. [2] Before dividends paid to non-residents; see also footnotes on Table 113. [3] Total of all monthly and quarterly series as in column 14, Table 90. [4] Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale price index moved 0.5 per cent higher in May from the level of April.

The index of industrial common stocks continued its upward trend in May.

The consumer price index continued to advance in May, reflecting upward movements in most of the components offset partly by a slight drop in the food group.

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. Source at bottom of Table 12.

---

[1] Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. [2] The labour force as a percentage of the population 14 years of age and over. [3] The unemployed as a percentage of the labour force. **Source: Labour Force Bulletin, (71-001), D.B.S.**

---

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. **Source: The Labour Force, (71-001) D.B.S.**

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes also publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and public administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D.B.S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end of December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

[1] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.
[2] 100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. [3] Customs exports. [4] Mill shipments destined for export. **Sources: Pulpwood Production (25-001), Trade of Canada, Exports (65-004), D. B. S; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.**

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D.B.S.**

[1] These totals include all generating agencies producing over ten million kilowatt hours per year. [2] These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3] Less imports. [4] Total net generation less net exports. [5] Mainly the amount used in electric boilers. **Source: Electric Power Statistics, (57-001), D. B. S.**

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. [1] Includes crude oil, condensate and pentanes plus. [2] Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. [3] Gross new production by field and processing plants less field flared and waste, Canadian sources only. [4] By gas utilities, Canadian sources only. **Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.**

---

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

Note: Components may not add to totals due to rounding differences. [1] The data are collected for 1,400 municipalities and individual figures are available on request. [2] Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. **Source: Building Permits (64-001), D.B.S.**

[1] The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

[1] Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. [2] Planks and boards, flooring and square timber. [3] Hollow blocks including fireproofing and load-bearing tile. [4] For building insulation only. [5] Figures cover the production of firms which normally account for 90 per cent of the total for Canada. [6] Factory sales of firms which normally account for 96% of total Canadian production. **Source: Concrete Products (44-002), Products made from Canadian Clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001), Production, Shipments and Stocks on Hand of Sawmills (35-002), (35-003) monthly, (35-204) annual and Trade of Canada, Imports (65-007), Exports (65-004), D. Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S.**

[1] These indexes are available for January, April and August only. [2] Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. [3] Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. [4] Barley No. 1 feed; hogs grade "B" alive. [5] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. [6] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. [7] Quotations refer to steers of all weights. [8] Grade "B1" hogs. **Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.**

[1] Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. [2] Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3] Annual data are monthly averages of crop year. [4] Includes eggs for hatching. **Sources: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada, Exports (65-004), D. B. S.**

---

[1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. **Source: Retail Trade (63-005), D.B.S.**

---

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1] Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2] Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans. [3] Cash loans with no conditional sales contract but usually repaid in instalments. [4] Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5] Loans other than secured loans and mortgage loans. [6] Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7] Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8] Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9] Amount owing to oil companies ex commercial accounts. [10] Excludes mortgage loans data available yearly only. [11] The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D. B. S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

---

[1] Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands.

[2] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions.

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500,000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100,000 or more gross annual operating revenues. [2] Includes Class I carrier only. These are carriers having $100,000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services ar included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily fro urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Sources Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60, 000 annually prior to January, 1964 and over $100, 000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18, 000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does no include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements mad under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commercia Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1] Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimate projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2] The monthly Canad totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither th monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3] Total new settled-for ordinary sales in Canada [4] Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford Connecticut, U.S.A.**

---

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to r profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entire comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the me fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Includ also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

---

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. [6] Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

A NOTE TO USERS

Revisions in Table 56:

The monthly data on the sales of new motor vehicles in Table 56 are revised for 1967. This is caused by changes in the valuation of new motor vehicles, i.e. actual consumer expenditures are now reported rather than the value based on manufacturers suggested list prices. The data prior to January 1967 have not been revised to the new basis and therefore are no longer comparable with the current statistics. Additional information concerning the above revisions is contained in the D.B.S. publication entitled "New Motor Vehicle Sales", Catalogue No. 63-007.

The seasonally adjusted counterparts for the above series on the new basis (Page S-5) are not available.

Annual Supplement to the Review:

The sixth issue of the Annual Supplement to the Review (1966 edition) will appear in print shortly and will carry the latest revised figures and the complete historical record of all series appearing in the S-pages of the monthly Review.

Other Material:

There is still available a limited supply of reprints on the feature article entitled "Surveys of Family Expenditure" (June 1967 issue). They are available on request, free of charge, from the Current Business Indicators and Time Series Data Bank Section, Economic Accounts Branch, D.B.S.

Annual Subscription: $5.00 — Single copy: 50c.

This review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications may be ordered from Publications Distribution, Dominion Bureau of Statistics, Ottawa, Ont. or from the Queen's Printer, Ottawa, Canada, and remittances made payable to the Receiver General of Canada.

OLD AGE SECURITY IN CANADA[1]

One of the manifestations of social betterment in Canada's recent history is the evolution of a broad public and private pension system. Although this pension system had its roots in the last quarter of the nineteenth century, its present shape and form is a twentieth century development, with the most vigorous growth occurring in the past twenty-five years. Income-maintenance for the retired population in Canada is now provided by a combination of the Old Age Security Pension, the Guaranteed Income Supplement which assures a minimum income of $105 monthly for all old age pensioners, the Canada and Quebec Pension Plans, and for some, group industrial pensions or other private pension arrangements. Therefore, as Canada enters its first Centennial year, her citizens can look forward to some degree of financial security on retirement so they may spend old age in security and with dignity. This article will briefly sketch the historical development of Canada's pension system, point out some of the social, economic and institutional forces that gave it direction and shaped its growth, and will indicate the extent of coverage by these benefits.

The Historical Background

The concept of a pension is not new nor exclusive to this century. Early records reaching as far back as the Roman Empire show that even in those days pensions were provided through grants of freehold land given to retiring soldiers. The principle evolved over the centuries and reached its most elaborate degree of development in pre-revolutionary France under the "ancien régime", but abuses were so rife and widespread that after the revolution it was replaced by a more orderly system which became the forerunner of the 19th century French system of public and private pensions.

In Canada, pensions first took the form of payments to soldiers retiring from the British regiments serving in Canada. One of the earliest systematic arrangements for retirement was the Superannuation Act of 1870 introduced by the federal government for its civil servants. The first plan in private industry appears to have been the contributory plan introduced in 1874 by the Grand Trunk Railway for the clerical and indoor staff. There were, of course, a number of informal arrangements for long term employees. In some instances elderly workers were retained on payroll for extended periods, and some companies provided retirement gratuities to employees of long standing.

At the turn of the century Canada was still a young, mainly agricultural country with relatively few aged persons. In those early days thrift was considered an essential personal duty and everyone was expected to save for his old age. Based on this premise, in 1908 Canada introduced the Government Annuities Act marking the beginning of federal legislation in this field. It was anticipated that this Act would encourage savings by providing secure and low cost facilities to accumulate funds earmarked for old age. However, even with these facilities many people reached old age unable to work, and without adequate savings to provide for their needs. As early as 1924 a special committee of the House of Commons recommended that an old age pension system be established for indigent British subjects aged 70 and over providing a maximum monthly pension of $20 subject to a means test, with half the costs being borne by the federal government. This recommendation was embodied in the Old Age Pension Act of 1927, and provincial enabling legislation introduced separately by each province gradually extended these benefits to all parts of the country.

Factors Affecting Pension Growth

The public measures increased interest in the problems of providing for old age and may have somewhat stimulated the development of pension plans. But the onslaught of the depression in the 'thirties dampened any growth in this area. It was not until the wartime conditions of 1940 that an impetus for expansion was created. Production demands of the war together with manpower shortages tended to focus employer attention on personnel problems. Labour was at a premium, and in order to meet heavy production schedules, management employed every possible means of encouraging higher productivity. Furthermore, this labour shortage coupled with a wage ceiling, led employers to place greater emphasis on working conditions and improved benefits to attract and hold their work force.

In addition to these short-run factors the growth and development of the pension system in Canada can be directly linked with one of the most significant economic and social developments in this century—the increase in both the number and proportion of the population in the so called aged category of sixty-five and over. During the past sixty odd years the population in Canada has tripled while the number of persons aged sixty-five or over has increased fivefold. In 1901 there were 271,000 people in this age group whereas today there are over 1,520,000. In relative terms this age group increased from five per cent of the population in 1901 to 7.6 per cent at the present time. This trend can be expected to continue upwards, in a large measure due to the increased life expectancy resulting from medical advances.

---

[1] Prepared in Labour Division by Mr. H. Weitz, Assistant-to-the-Chief, (Pensions) Unemployment Insurance, Pensions and Manpower Section.

Accompanying this increase in the number, has been a sharp decline in employment opportunities for the aged. In a study conducted by the Dominion Bureau of Statistics[2] it was found that just over sixty per cent of the older male population had a labour force attachment in 1921, in 1961 the proportion dropped to thirty per cent and by 1970 it was estimated that only one in four males over the age of sixty-four will be a member of the economically active population. Many factors contributed to the declining labour force participation of this sector of our population. The most significant perhaps was the transition in Canada from an economy dominated by agriculture, small businessmen and independent craftsmen to a more industrialized economy dominated by wage-earners. Also contributing are the institutional and social factors such as the widespread acceptance of age 65 as normal retirement age, the increased urbanization of society with the changes in housing conditions making it more difficult for older people to reside with younger members of the family. The problems raised by these developments can best be resolved through the provision of financial security for people of pensionable age so that financial necessity will not force them to continue working.

The expanded industrialization in Canada over the past two decades brought with it changes in our economy which tended to create a wider interest in pension planning. Increased concentration of ownership and the resultant growth in the number of larger firms provided an instrument through which funds could be accumulated.

From the employers' viewpoint there was a need for a systematic retirement policy. Pension plans permitted impartial retirement of workers who reached a selected age, and relieved the employer of the moral responsibility for retaining older employees whose industrial efficiency may have been impaired by age. Introduction of pension plans by employers was probably also influenced by federal legislation that made contributions to approved pension funds deductible for tax purposes. Employees' interest in their future security has been reflected in the increasing frequency with which pension provisions have been among the more active issues in collective bargaining. All these factors contributed to the growth of the pension system.

Legislative Response

The changing economic and social conditions created additional pressures on society as a whole to systematically provide for the growing numbers of aged people. In response to these pressures one of the ways both the public and private sectors of our economy met the challenge was through the expansion and improvement of pension coverage. In the public sector, the federal-provincial cost-sharing Old Age Pension Act of 1927 with its means-test benefits was replaced in 1951 by the Old Age Security Act, which, starting January 1952, provided a universal old age pension to all persons aged 70 or over who met residence requirements, regardless of any other income they may have received. This new act was a milestone in pension development in Canada for it marked the beginning of federal activity in an area which until this point had constitutionally been a field under provincial jurisdiction. The Old Age Security Act, was passed only after unanimous agreement of all provinces was obtained to amend the B.N.A. Act allowing the federal government to enter this field.

Old age security pension payments originally were set at $40 per month. This was raised in July 1957 to $46 and November 1957 to $55, by February 1962 it reached $65 and in October 1963 it went up to $75 per month. This final increase brought with it two major advances in this field. The first was a gradual reduction in the age limit so that in 1966 universal pensions became payable to those aged 69 or over, in 1967 to those aged 68 and so on until by 1970 these benefits will be paid to all persons aged 65 and over. The second advance was that, starting in 1968, the old age security benefit will be increased in line with advances in a pension index to reflect changes in living costs and protect the purchasing power of the pension against erosion by inflation.

Also in 1951 the Old Age Assistance programme was introduced. This was a joint federal-provincial cost-sharing programme providing means-test pensions to persons aged 65 to 69. In future as the age requirement for the universal old age security pension is reduced it will gradually absorb the elements under the assistance programme so that by 1970 all persons in Canada aged 65 or over who meet residence requirements will be covered by the universal pension regardless of any other income they may have.

Growth of Private Pension Plans

In the private sector of the economy there has been an accelerated growth of private pension plans. At the end of the First World War at least 172 formal plans were known to have been in operation in Canada and by September 1936 they had grown to some 600 plans. In 1947 approximately 3,400 plans were recorded covering nearly 500,000 employees.[3] By 1960 pension plans in Canada had grown to 9,000 covering 1,800,000 persons. The accelerated growth rate continued and according to the most recent DBS survey, between 1960 and 1965 pension plans in Canada increased nearly 50 per cent to over 14,000 and membership in these plans had grown by some 30 per cent to reach a total of 2,300,000.

[3] Survey of Pension and Welfare Plans in Industry, 1947 DBS, 1950.

Even with the impressive growth discussed above, there still remained wide gaps in the coverage by private pension arrangements. For example, out of the total labour force in December 1965 of 7,290,000 (including the armed forces) some 3,440,000 persons were employed in organizations having pension plans, but only two-thirds of these people, 2,300,000 were plan members. Of the balance, approximately half were temporarily ineligible to join existing plans because they had not yet fulfilled eligibility requirements; of the remainder, 147,000 elected not to become members and another 438,000 were permanently ineligible to join.

Emerging from these data is the fact that even where pension plans were available, as many as one third of the employees were not covered. Furthermore, only about 32 per cent of the total labour force including the armed forces participated in pension plans, and another half a million may become covered once they meet the eligibility requirements of their employer's plan. There remain, therefore, some 4,490,000 persons in the labour force who have no private group pensions whatsoever.

Furthermore, even where pension plans were available not only were there substantial exclusions but these plans also had certain shortcomings limiting their effectiveness in providing pensions in the future. One of these limitations was the vesting provision incorporated in most plans. This provision affects the accrued benefits in a plan when an employee terminates his employment prior to retirement. In 1965 of the 2.3 million people in pension plans only 7 per cent were entitled to immediate and full vesting of the employer's contributions if they left before retirement. Twenty-two per cent of the members would receive none of the employer's contribution if they changed jobs before retirement. Of the remaining employees most were required to stay under the same plan for 10 or more years in order to get all of their employers contributions. Perhaps the most limiting feature of pension plan provisions was the fact that accrued benefits were not locked-in so that employees moving from job to job may withdraw their own contributions, and in some cases the employer's portion as well. Since, during the course of a working lifetime employees tend to move from one job to another, and at each move they are able to withdraw accummulated credits, their pension benefits can easily be dissipated. It is conceivable therefore that an individual may spend 40 to 50 years working for a succession of employers, each with a good pension plan, and still reach retirement age with an inadequate pension since at each move accumulated contributions could be withdrawn.

Provincial Pension Legislation

In the early 1960's Canada's pension system came under intensive review at both the federal and provincial levels of government. There was some question as to whether control or supervision of private pension plans were within the legislative competence of the federal government. It was felt that under the terms of the BNA Act the power to regulate private pensions lies within provincial jurisdiction over property and civil rights.

At the provincial level, therefore, the Province of Ontario took the first step in regulating private pension plans that came under its jurisdiction. In the spring of 1963 Ontario enacted the Pension Benefits Act. The original terms of the Act required all employers with 15 or more employees to provide a minimum portable pension plan. However, when it was learned that the federal government was actively considering introducing the Canada Pension Plan which would cover virtually all employed persons in Canada, the feature compelling employers to provide a plan was rescinded. Ontario legislation, therefore, was confined to the regulation and supervision of existing and any new pension plans.

The Ontario Pension Benefits Act which became effective July 30, 1965 was designed to strengthen pension plans operating in the province. The legislation set minimum standards of vesting and solvency. To enhance the security of the funds on which pensions depend, all plans in effect on January 1, 1965 were to become fully funded not later than 25 years after that date. Thereafter, any new deficits in the fund are to be amortized over not more than five years. Furthermore, the regulations require that the investment of pension funds be in accordance with certain established rules. Employees who terminate employment after reaching age 45 and completing 10 years of continuous service have full vesting with contributions paid after January 1, 1965 locked-in until retirement. This restricts the wastage of pension rights through job changes. Furthermore, under the Act employees must be adequately informed of their rights and benefits in the pension plan.

With the promulgation of the Ontario legislation it became evident that unilateral regulation of private pension plans by each of the provinces could lead to confusion. Since activities of many national corporations with pension plans, cut across provincial boundaries these would be subject to conflicting regulations between the provinces. Furthermore, portability of pensions between provinces could be adversely affected.

To encourage uniformity in pension legislation a conference entitled "The Interprovincial Conference on Uniform Pension Legislation" was convened by the Ontario Government in October 1964. This organization formulated an acceptable draft of uniform pension legislation which could be introduced by each province. Ontario was the first province to amend its Pension Benefits Act to comply with this uniform legislation. Following closely was Quebec which in July, 1965 passed the Supplemental Pension Plans Act patterned on this legislation. Similarly, the Alberta Pension Benefits Act came into force January 1967, and Saskatchewan introduced their legislation in 1967 but it has not yet been proclaimed. Also in 1967 the federal act was passed covering "persons employed in connection with certain works, undertakings and businesses" which are within federal legislative authority. Although other provinces participated in the development of the uniform legislation, and some have expressed interest in it, no further extensions have yet been introduced.

The Canada and Quebec Pension Plans

Concurrent with the action taken by Ontario in this field, the federal government directed its efforts toward filling the gap areas that fell within its jurisdiction. These studies culminated in the introduction in 1965 of the Canada Pension Plan. To make the provisions as broad as possible section 94A of the BNA Act was amended, with unanimous consent of all provinces, permitting the federal government to legislate for such supplementary benefits as disability pensions and widows and orphans benefits.

The Canada Pension Plan was designed to cover virtually all employed persons in Canada between the ages of 18 and 70 earning more than $600 annually or if they are self-employed, more than $800. The benefits represent, at most, the minimum level of income for retirement, for people who become disabled and for the dependents of those who die. This left considerable scope for the continuation and extension of private pension plans to provide benefits above these minimum levels. The Canada Pension Plan providing a compulsory, wage-related contributory pension was enacted in 1965 and the contributions started January 1, 1966. The Act made provision for a province to establish and operate its own provincial pension plan provided certain requirements were met. The Province of Quebec elected to invoke this section of the Act and enacted similar legislation to establish the Quebec Pension Plan, with contributions also commencing January 1, 1966.

The plans provide a retirement pension related to earnings on which contributions have been made. The scale of this pension will rise during a ten-year transitional period to a level of 25 per cent of these earnings. Employers and employees each contribute 1.8 per cent of the employee's earnings between $600 and $5,000; self-employed persons contribute 3.6 per cent of earnings between $800 and $5,000. The $5,000 ceiling will apply during the first two years and is subject to upward adjustment if there are increases in the cost-of-living index (maximum adjustment per year is 2 per cent). Pensions will also be increased annually by the same rate as measured by the consumer price index.

Until the plans are 10 years old, the rates of the retirement pension will build up steadily. For example in 1967, after one year's contribution, the retirement pension will be 2.5 per cent of earnings, or $10.42 monthly for anyone whose year's earnings were $5,000 or more. For anyone retiring in 1968, the pension will be 5 per cent of earnings and so on until the top rate of 25 per cent of earnings is reached after 10 years. The Old Age Security pension of $75 monthly, of course, will be available in addition to the wage-related benefits.

Although the Canada and Quebec Pension Plans covered virtually all employed persons in Canada there still remained a group of older people who could not benefit or could benefit only in part from the public plans. These were some 900,000 senior citizens who were already retired, living on modest incomes, in many instances on little more than the $75 monthly they received from the Old Age Security programme. To provide for this group, Parliament of Canada in December 1966 enacted the Guaranteed Income Supplement as an amendment to the Old Age Security Act, guaranteeing old age security recipients an income of $1,260 a year for a single person or $2,250 per year for married pensioners. This includes the universal pension of $75 a month and a monthly supplement of up to $30, which is subject to an income test. Pensioners who have some income, such as a small pension or part-time employment may receive partial benefit. The maximum monthly supplement is 40 per cent of the old age security pension each year and is reduced by one dollar for each two dollars of a pensioner's monthly income. Payments will continue during temporary absences from Canada of up to six months.

Summary

An increasing degree of financial security has become available to Canada's senior citizens through a developing system of public and private pension programmes. Today all persons in Canada who are 68 years of age, or over, and meet the residence requirements receive a pension of $75 per month under the Old Age Security Act. The age requirement will be reduced gradually until by 1970 the universal pension will be payable to all persons age 65 or over. In 1968 and succeeding years, the pension will be adjusted by increases in the Pension Index developed for the Canada Pension Plan.

All recipients of the universal pension are guaranteed a minimum income of $105 a month through the Guaranteed Income Supplement Programme. This supplement, which became effective in January 1967, is subject to an earnings test and provides up to $30 per month over and above the $75 universally payable to all eligible residents in Canada.

Supplementing this income will be the benefits available to all employed persons covered by the Canada and Quebec Pension Plans. By 1976 when these plans reach full maturity, benefits will be as much as $104.17 per month for anyone earning $5,000 or more annually. The monthly pension from this wage-related plan is subject to escalation in line with recorded increases in the Pension Index.

In addition to these public programmes, approximately 32 per cent of the labour force (including the armed forces) may also receive payments from private group pension plans. To ensure solvency of these plans, and portability of accrued pension rights a number of provinces have enacted legislation to supervise the operation of private pension plans. This legislation set minimum standards to which all plans operating within each jurisdiction must comply. All provinces who have enacted the uniform pension legislation follow common administrative procedures to facilitate portability of pension rights between jurisdictions.

LABOUR FORCE (More detail in Table 19)

Employment and total labour force were slightly lower in June while unemployment remained at the high level of the previous month. The unemployment rate was 4.4 per cent.

		total labour force	total employed	employed non-agriculture	unemployed	unemployment rate	not in the labour force

CONSTRUCTION (More detail in Tables 67, 72 and 73)

Value of building permits was higher in May in both the residential and non-residential sectors, with the increase in the latter being more pronounced.

Housing starts remained at a high level in June while completions dropped sharply from the irregularly high point recorded in May.

		value of building permits			new dwelling construction, centres 10,000 and over

[1] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

Manufacturing shipments and new orders picked up in April from the level of the previous month while unfilled orders moved down and inventories were virtually unchanged.

Rail revenue freight loaded declined about 2 per cent in June.

		manufacturing, all industries						
		owned inventories	shipments	new orders	unfilled orders	rail revenue freight loaded	cheques cashed in clearing centres	consumer credit outstanding[1] (end of month)

[1] Gross National Product at market prices excluding accrued net income of farm operators from farm production. [2] Before dividends paid to non-residents; see also footnotes on Table 113. [3] Total of all monthly and quarterly series as in column 14, Table 90. [4] Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale price index moved fractionally higher in June.

The index of thirty industrial materials recorded a third straight month of increase in June.

The consumer price index advanced by 0.5 per cent in June as all components showed increases. The food group was 0.8% higher in the period following the 0.2% drop the previous month.

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. Source at bottom of Table 12.

[1] Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. [2] The labour force as a percentage of the population 14 years of age and over. [3] The unemployed as a percentage of the labour force. **Source: Labour Force Bulletin, (71-001), D.B.S.**

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing t seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discr- ancy. **Source: The Labour Force, (71-001) D.B.S.**

---

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers, the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are no shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes also publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and public administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

Table 31: average weekly wages and salaries,[1] by industrial divisions, based on the 1960 standard industrial classification-(dollars)

monthly averages	industrial composite	forestry	mining, including milling	manufacturing			construction	transportation, communication and other utilities	trade		finance, insurance and real estate	service
				total	non-durable goods	durable goods			wholesale	retail

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D.B.S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

---

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end of December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D.B.S.**

[1] These totals include all generating agencies producing over ten million kilowatt hours per year. [2] These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3] Less imports. [4] Total net generation less net exports. [5] Mainly the amount used in electric boilers. **Source: Electric Power Statistics, (57-001), D. B. S.**

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. [1] Includes crude oil, condensate and pentanes plus. [2] Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. [3] Gross new production by field and processing plants less field flared and waste, Canadian sources only. [4] By gas utilities, Canadian sources only. **Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.**

---

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

Note: Components may not add to totals due to rounding differences. [1] The data are collected for 1,400 municipalities and individual figures are available on request. [2] Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. **Source: Building Permits (64-001), D.B.S.**

[1] The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S.**

[1] These indexes are available for January, April and August only. [2] Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. [3] Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. [4] Barley No. 1 feed; hogs grade "B" alive. [5] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. [6] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. [7] Quotations refer to steers of all weights. [8] Grade "B1" hogs. **Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.**

[1] Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. [2] Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3] Annual data are monthly averages of crop year. [4] Includes eggs for hatching. **Sources: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada, Exports (65-004), D. B. S.**

[1] Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted. [2] Includes stocks held by manufacturers, wholesalers and other warehouses. [3] Many mills were operating at more than the standard 26 working days in the month. [4] Includes solid, coated, bulk, packages and novelties. [5] Includes beef stews and boiled dinners. [6] Includes tomato sauce, sauces for meat and fish and sauces, other. **Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations, (32-017), Miscellaneous Food Preparations (32-018), Monthly production of soft drinks (32-001), Monthly Meat and Meat Preparations, D. [1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. **Source: Retail Trade (63-005), D.B.S.**

Table 85: value of retail trade by types of business & provinces, based on the 1960 standard industrial classification – concluded

[1] Department store stocks at end of period at selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by components for the period prior to 1967 are based on the 1951 Census. **Source: Department Store Sales and Stocks (63-002), D.B.S.**

Note: Components may not add to totals due to rounding. [1]Fully secured by marketable bonds and stocks. Excludes loans to finance the purchase of Canada Savings Bonds. [2]Includes loans on the security of household property. [3]Includes loans to finance companies which are affiliates of retail merchandisers. [4]Religious, educational, health and welfare institutions. [5]Not available on a monthly basis. [6]Differs from general loans in Table 106 by the exclusion of loans to instalment finance companies. **Sources: Statistical Summary of the Bank of Canada and Dept. of Finance.**

---

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1] Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2] Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans. [3] Cash loans with no conditional sales contract but usually repaid in instalments. [4] Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5] Loans other than secured loans and mortgage loans. [6] Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7] Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8] Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9] Amount owing to oil companies ex commercial accounts. [10] Excludes mortgage loans data available yearly only. [11] The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D. B. S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

[1] Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands.

[2] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions.

Source: Trade of Canada Imports (65-007), D. B. S.

Table 93: merchandise exports by commodities, based on the standard commodity classification[1] (million dollars)

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500,000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100,000 or more gross annual operating revenues. [2] Includes Class I carrie only. These are carriers having $100,000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services c included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily fr urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Source Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60, 000 annually prior to January, 1964 and over $100, 000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18, 000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does n include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontari Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements ma under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commerci Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1] Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimat projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2] The monthly Cana totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3] Total new settled-for ordinary sales in Canad [4] Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartfo Connecticut, U.S.A.**

---

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to n
profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of
companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated
Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entire
comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the met
fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Includ
also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

---

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. [6] Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

A NOTE TO USERS

Revisions:

The monthly seasonally adjusted series on Employment, Hours and Earnings (Tables 28 to 35 inclusive, and pages S-3 and S-4) have been revised for the entire period 1961 to date. Back records on the revised basis are available upon request.

Months for Cyclical Dominance (M.C.D.):

The user will find this expression in abbreviated form in several tables throughout this publication.

The measure indicates the number of months required on average for emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of five implies that a five-month moving average is required to offset irregular movements and allow examination of the underlying cyclical trend.

The M.C.D. is used in Tables 17, 18, 20, 21, 22, 23, 24, 25, 28, 29, 42, 43, 44, 45, 67, 85, 90, 91 and 92 to indicate the relative variability of the series. Its value can range from one to six months since values greater than this are not calculated. In the S-section, for series with an M.C.D. of four or more, five-term moving averages are used to aid in charting. These averages are correct for series with an M.C.D. of five, but for M.C.D.'s of four or six they are used as approximations to avoid the problem of centering even-term averages. The M.C.D. is not charted for series with values of three or less, since it does not increase the clarity of the charted series.

INDUSTRIAL PRODUCTION (More detail in Table 16)

The seasonally adjusted Index of Industrial Production advanced by 0.3 per cent in June. Both mining and manufacturing contributed to the increase advancing by 1.8 and 0.3 per cent respectively, while electric power and gas utilities fell by 1.6 per cent. Within manufacturing the gain was confined to non-durables, (+0.9 per cent) as durables fell by 0.4 per cent.

EMPLOYMENT, SELECTED INDUSTRIES (More detail in Table 28)

The Index of Employment in manufacturing (1961 = 100) was 1.1 per cent lower in May reflecting mainly a decline of 1.9 per cent for durable manufacturing. Employment in construction was down 6.5 per cent while services was 1.7 per cent higher.

INCOME, EARNINGS AND HOURS (More detail in Tables 18, 34 and 35)

Total labour income at $2,645 million in May was virtually unchanged from April.

Average hourly earnings in manufacturing were almost unchanged at $2.37 in May, but increased 6.8 per cent from $2.22 in May 1966. For durables and non-durables the increases over the year were 5.8 and 7.8 per cent respectively.

Average weekly hours in manufacturing were down slightly in May.

---

[1] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some millions.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

Manufacturing shipments and New Orders were slightly lower in May, declining by 3.1 and 2.6 per cent respectively. Inventories and Untilled Orders showed little change.

Rail revenue freight loaded declined 2.6 per cent to 14.80 million tons between May and June.

[1] Gross National Product at market prices excluding accrued net income of farm operators from farm production. [2] Before dividends paid to non-residents; see lso footnotes on Table 113. [3] Total of all monthly and quarterly series as in column 14, Table 90. [4] Seasonally adjusted figures for this series do not incorporate evisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale index was steady in July, while the thirty industrial materials index declined 1.4 per cent from 256.7 to 253.0. The industrial common stock index rose 1.9 per cent from 181.7 to 185.2.

The consumer price index increased 0.9 per cent to 150.2 at the beginning of July from 148.8 in June. Increase in the food index accounted for close to 70 per cent of the total rise.

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. Source at bottom of Table 12.

---

[1] Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. [2] The labour force as a percentage of the population 14 years of age and over. [3] The unemployed as a percentage of the labour force. **Source: Labour Force Bulletin, (71-001), D.B.S.**

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. **Source: The Labour Force, (71-001) D.B.S.**

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such c those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 worker the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are n shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes al publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and ublic administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D.B.S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

---

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end o December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. Excludes rebottling and inter-industry transfers. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

[1] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [2] 100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. [3] Customs exports. [4] Mill shipments destined for export. **Sources: Pulpwood Production (25-001), Trade of Canada, Exports (65-004), D. B. S; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.**

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D. B. S.**

[1] These totals include all generating agencies producing over ten million kilowatt hours per year. [2] These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3] Less imports. [4] Total net generation less net exports. [5] Mainly the amount used in electric boilers. **Source: Electric Power Statistics, (57-001), D. B. S.**

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

[1]The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

[1] Cash receipts from farming operations excluding supplementary payments. Excludes Newfoundland. [2] Represents participation payments made by the Canadian Wheat Board direct to producers on crops delivered in previous years. [3] Includes rye, flaxseed, rapeseed, soybeans and corn. [4] Includes clover and grass seed, hay, clover, greenhouse products, mustard seed, sunflower seed, hops, dry beans and dry peas and miscellaneous products. [5] Made under the authority of the Agricultural Stabilization Act. **Source: Farm Cash Receipts (21-001), D. B. S.**

Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S.**

---

[1] These indexes are available for January, April and August only. [2] Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. [3] Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. [4] Barley No. 1 feed; hogs grade "B" alive. [5] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. [6] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. [7] Quotations refer to steers of all weights. [8] Grade "B1" hogs. **Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.**

[1] Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. [2] Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. [3] Annual data are monthly averages of crop year. [4] Includes eggs for hatching. **Sources: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada, Exports (65-004), D. B. S.**

[1] Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted. [2] Includes stocks held by manufacturers, wholesalers and other warehouses. [3] Many mills were operating at more than the standard 26 working days in the month. [4] Includes solid, coated, bulk, packages and novelties. [5] Includes beef stews and boiled dinners. [6] Includes tomato sauce, sauces for meat and fish and sauces, other. **Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations, (32-017), Miscellaneous Food Preparations (32-018), Monthly production of soft drinks (32-001), Monthly Meat and Meat Preparations, D.B.S.**

[1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. **Source: Retail Trade (63-005), D.B.S.**

[1] Department store stocks at end of period at selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by components for the period prior to 1967 are based on the 1951 Census. **Source: Department Store Sales and Stocks (63-002), D.B.S.**

Table 87: value of wholesale trade[1], based on the unrevised standard industrial classification (million dollars)

---

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1]Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2]Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans. [3]Cash loans with no conditional sales contract but usually repaid in instalments. [4]Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5]Loans other than secured loans and mortgage loans. [6]Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7]Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8]Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9]Amount owing to oil companies ex commercial accounts. [10]Excludes mortgage loans data available yearly only. [11]The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D. B. S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

Table 91: merchandise exports (including re-exports) by major countries and areas (million dollars)

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500,000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100,000 or more gross annual operating revenues. [2] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services are included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily from urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Sources: Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60, 000 annually prior to January, 1964 and over $100, 000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18, 000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does no include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements mad under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commercia Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimat projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2]The monthly Canad totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither th monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3]Total new settled-for ordinary sales in Canad [4]Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartfor Connecticut, U.S.A.**

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to ne profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of a companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated i Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirel comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the meta fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Include also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. [6] Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

NATIONAL ACCOUNTS, INCOME AND EXPENDITURE
SECOND QUARTER, 1967

Introductory Review

Gross National Product in the second quarter reached a level of $61.5 billion, seasonally adjusted at annual rates, an increase of 2.2 per cent from the first quarter. With prices rising, this advance represented a gain of close to 1 per cent in real terms.

Although the rise in the current value of GNP roughly matches the average increase in three of the four preceding quarters, the advance in constant dollars compares less favourably.

At over $2 billion, the increase in total demand (GNE plus imports) was the largest in five quarters; components of demand displayed wide fluctuations. On the income side the factors of production contributed fairly evenly to the domestic portion of this increase; this was strongly reinforced by supplies coming from abroad. Although its effect cannot be fully evaluated in quantitative terms, centennial celebrations and in particular EXPO had a pervasive effect on the economy.

In absolute terms, seasonally adjusted, the main strength in demand came about equally from the government sector and persons. Expenditures on new residential construction increased sharply after three quarters of decline. Exports continued to advance with a gain of nearly $700 million, following a $1 billion advance in the first quarter. Offsetting these increases were declines in business construction and machinery and equipment, while investment in non-farm inventories added very little to overall demand.

Percentage Change from Preceding Quarter

(Seasonally adjusted data)

	1966				1967	
	1Q	2Q	3Q	4Q	1Q	2Q
GNP current $	4.5	2.0	0.5	2.2	1.8	2.2
GNE constant $	2.7	1.0	– 0.7	1.3	0.5	0.8
Price (implicit)	1.8	1.0	1.2	0.9	1.3	1.4

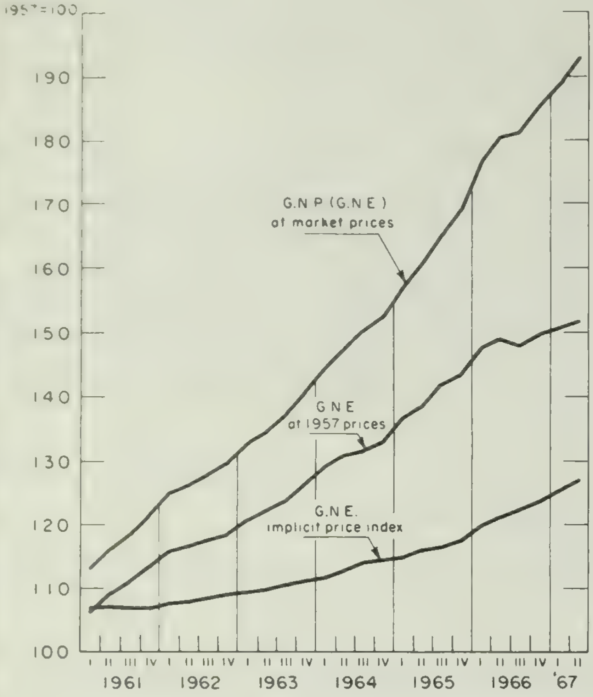
The $800 million increase in personal expenditure was widely shared. Aided by a 14 per cent rise in new car purchases – only the second increase in the last seven quarters – durables reversed the decline of the two previous quarters and advanced by 6½ per cent, while many other items also increased substantially. A 22 per cent increase in outlays for new residential construction added some $432 million to demand; significantly affecting this rise was a special inflow of mortgage funds. This offset the declines of the last three quarters and restored expenditures to the level of a year ago. However, the availability of mortgage funds is decreasing, and housing starts in urban areas have been declining from the high point in May. The rate of investment in machinery and equipment declined for only the third time since 1961; a contributing factor to the lower value of investment was the reduction in April and the elimination in June of the sales tax on production machinery.

After a sizeable cut-back in the rate of accumulation in the first quarter, the rate of investment in non-farm business inventories showed virtually no change. Unlike the situation in the United States, where a substantial decline in the rate of accumulation took place in the last two quarters, in Canada this process was spread more evenly over the last four quarters.

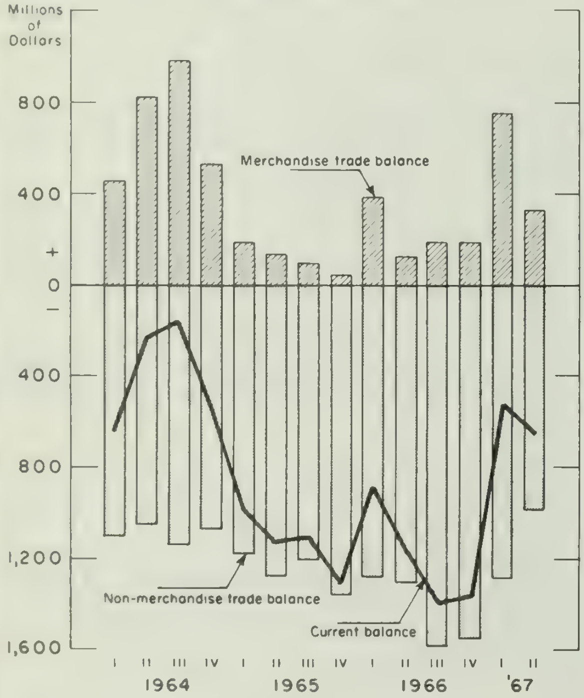
The deficit on current account widened somewhat as the largest increase in imports in the expansion more than offset a considerable rise in exports. The gain in the exports was more than fully accounted for by a net gain in the travel account of $800 million, while the surplus on merchandise account declined by over $400 million as exports increased only fractionally from the exceptionally high levels of the first quarter.

On the income side, labour income increased by less than 2 per cent – the smallest quarterly gain since the fourth quarter of 1964. The trend of the previous quarter continued with small payroll increases in the goods-producing industries compared with the service industries. Most of the gain in employment was absorbed by the service sector; employment in goods-producing industries actually declined. Seasonally adjusted unemployment rates showed month-to-month increases in May and June but declined in both July and August. Corporation profits increased some 5½ per cent from the low first quarter level, but remained significantly below the level of the first half of last year.

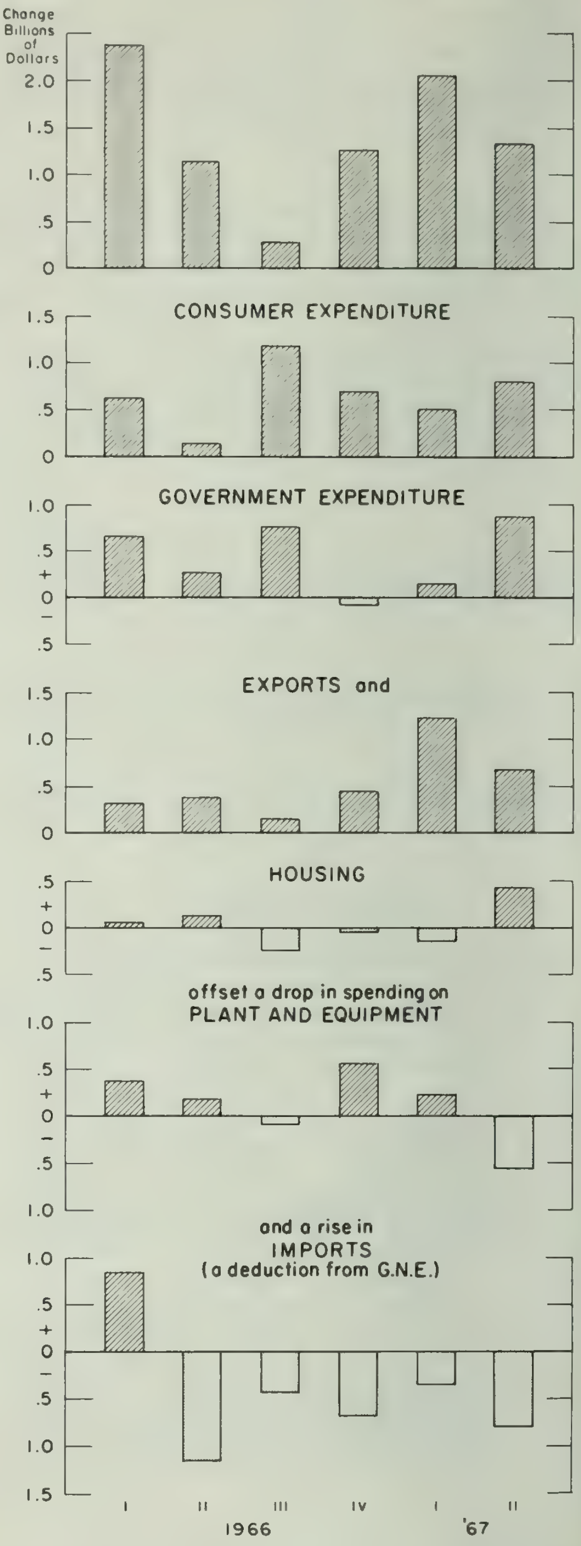
G.N.P. rose 2.2 per cent in the second quarter. In real terms the advance was close to 1 per cent.



CURRENT ACCOUNT deficit increased as an improvement of $300 million in service balance less than offset a drop of $424 million in merchandise balance



G.N.E. in current dollars rose $1.3 billion in the second quarter as increases in



ALL DATA SEASONALLY ADJUSTED, AT ANNUAL RATES

Price Movements

The implicit price index of gross national expenditure rose 1.4 per cent from the first quarter.

Seasonally adjusted food prices, which fell 1.2 per cent in the first quarter, declined fractionally this quarter; they were about 0.8 per cent below their level of the second quarter of 1966. Some increase occurred in miscellaneous meats, vegetables, and fish, but these were more than offset by price decreases in beef, eggs, pork, and poultry.

Non-food commodities showed an overall price increase of more than 1 per cent. This was partly a reflection of changes in sales tax. Tax increases in Quebec and in Newfoundland from 6 to 8 per cent and 5 to 6 per cent respectively affected the entire quarter, while a 5 per cent sales tax was introduced in Manitoba effective June first. Within non-durables, prices for men's clothing, footwear, and newspapers and magazines all increased by about 2 per cent on a seasonally adjusted basis. Electricity showed a sharp 10 per cent increase owing mainly to higher rates in Quebec and British Columbia. Price increase in durable goods was more moderate than in non-durables. Increases were relatively large in home furnishings, jewellery, and furniture, all of which increased by more than 1 per cent. A one-half per cent increase occurred in the seasonally adjusted price of cars.

Nearly all items contributed to the 2½ per cent rise in service prices. Purchased transportation, education, and recreation rose by more than 3 per cent; a similar increase in medical care was largely the result of rises in the fees charged by medical practitioners and dentists.

The implicit price index for business gross fixed capital formation declined fractionally, the net effect of an upward movement in construction prices and a fall in the prices of machinery and equipment. Price increases in residential and non-residential construction reflected higher costs – mostly in labour, but also in materials. The 2½ per cent decline in seasonally adjusted machinery prices was largely due to changes in the federal sales tax on production machinery, which was lowered from 11 to 6 per cent in April and eliminated in June.

The following table summarizes the price changes outlined above.

Implicit Prices Indexes – Percentage Change from the Preceding Quarter

(Based on seasonally adjusted data)

	1966				1967	
	I	II	III	IV	I	II
Personal expenditure	1.3	1.1	0.5[1]	0.9	0.6	1.2
Non-durable goods	1.8	1.0	0.5[1]	0.5	– 0.1	0.9
Durable goods	– 0.5	1.0	– 0.3[1]	1.3	0.4	0.8
Total goods	1.3	1.4	0.4[1]	0.8	0.1	0.8
Of which: Food	3.1	1.1	0.5	–	– 1.2	– 0.1
Non-food goods	0.4	1.2	0.3[1]	1.2	0.7	1.3
Services, excluding net expenditure abroad	1.2	1.0	1.0	1.0	1.4	2.4
Government expenditure on goods and services	3.0[1]	0.6[1]	1.5[1]	2.1[1]	3.0[2]	2.1[2]
Business gross fixed capital formation	1.3	1.0	0.7	1.5	1.1	– 0.2
New residential construction	1.6	0.9	1.1	2.3	0.6	2.2
New non-residential construction	1.4	1.5	1.1	1.5	0.9	1.5
New machinery and equipment	0.7	0.7	0.5	1.4	1.5	– 2.7
Exports of goods and services	0.8	0.7	1.7[1]	0.4[1]	0.3[1]	0.1[1]
Imports of goods and services	0.3	0.4	0.5	0.9	– 0.3	0.3
Gross national expenditure	1.8	1.0	1.2	0.9	1.3	1.4
(Base-weighted price index of gross national expenditure)	1.3	1.6	1.3	1.1	0.8	1.2

[1] The implicit price indexes in some quarters may not provide reasonable measures of price change as a result of marked quarter-to-quarter changes in expenditure patterns. Such was the case notably in the third quarter of 1966. The quarter-to-quarter changes footnoted in the table are based on price indexes in which the effect of changes in expenditure patterns has been discounted.

[2] Changes in this component for the first and second quarters of 1967 are not necessarily analytically significant.

The Components of Demand

Personal Expenditure on Consumer Goods and Services

Total personal expenditure reached a level of $37.3 billion, seasonally adjusted at annual rates, an increase of more than 2 per cent from the first quarter as compared with a little less than 1½ per cent advance in the previous quarter. It should be noted that this total does not include the surge of expenditure made by foreign tourists coincident with EXPO 67 and centennial celebrations.[1]

The following table indicates the impact of this item on total personal expenditure in Canada.

Almost all components of the non-durables category showed increases from the previous quarter. The largest increase occurred in expenditures on energy sources (fuel, electricity, gas) which rose by 7½ per cent. The clothing category increased by 5 per cent. Within this category men's clothing showed the strongest gain, while women's and children's clothing advanced more moderately. Expenditures on tobacco increased by 4½ per cent and on alcoholic beverages by 6 per cent. The food category rose by 2 per cent, while food prices decreased slightly. Spending for gasoline, oil and grease increased fractionally, declined 1 per cent for auto parts and accessories, and rose 3½ per cent for household non-durables.

The dominant feature of the 6½ per cent gain in durables was a 14 per cent increase in expenditures on new automobiles. A parallel increase in trade-ins coupled with a small decline in used car purchases resulted in a large decline in the net value of used cars purchased; taken together, expenditures on new and used autos rose by 9 per cent. Furniture showed an 11 per cent gain as against a 3 per cent decline last quarter, while appliances and radios rose by 4 per cent and home furnishings registered a second successive 4½ per cent increase. Jewellery purchases rose by 5½ per cent.

The 4 per cent increase in services inclusive of non-resident spending was largely centered in the three components significantly affected by EXPO. Sharpest was the 25½ per cent gain in recreation expenditures, but notable also were the 9½ per cent increase in purchased transportation (the revenues of urban transit facilities in Quebec in May and June were almost double those for the corresponding period in 1966) and the 4½ per cent increase in miscellaneous services, which includes accommodations in hotels and motels. Gains of 2 to 2½ per cent were made in user-operated transportation, household operations, and medical care; personal services rose by 1 per cent. The shelter component, accounting for nearly 40 per cent of the value of services, increased by one half of 1 per cent.

	Millions of dollars, seasonally adjusted, at annual rates				
	4 Q '66	1 Q'67	2 Q'67	Change	
				4 Q to 1 Q	1 Q to 2Q
Non-durables	17,520	17,740	18,372	220	632
Durables	4,268	4,168	4,440	− 100	272
Services (excluding NEA)	14,104	14,512	15,108	408	596
Total personal expenditure in Canada	35,892	36,420	37,920	528	1,500
Net expenditure abroad (NEA)	96	68	− 632	− 28	− 700
Personal expenditure on consumer goods and services	35,988	36,488	37,288	500	800

---

[1] Personal expenditure on consumer goods and services is a measure of all expenditures by Canadian residents, including those temporarily abroad. Since measures of the value of outlays on consumer goods and services in Canada are derived from sales made within the territorial boundaries of Canada, the values must be adjusted to include expenditures abroad by Canadian residents and to exclude outlays in Canada by non-residents. This adjustment is called **Net expenditure abroad.**

Net expenditure abroad is composed of outlays on both commodities and services. As it is impossible to determine these elements in the net figures, the whole adjustment has traditionally been included with services. The item is generally small and does not significantly distort quarter-to-quarter comparisons of either aggregates or individual series. However, with the exceptional influx of tourists occurring in the second quarter of 1967, the adjustment to exclude purchases by non-residents has become large, distorting the analytical continuity of the Services series. The values of net expenditure abroad and the values of services excluding net expenditure abroad for the last six quarters are shown in the table below (in millions of dollars and seasonally adjusted at annual rates):

	1 Q'66	2 Q'66	3 Q'66
Services including NEA	13,384	13,556	13,892
Services excluding NEA	13,268	13,488	13,772
Net expenditure abroad	116	68	120

	4 Q'66	1 Q'67	2 Q'67
Services including NEA	14,200	14,580	14,476
Services excluding NEA	14,104	14,512	15,108
Net expenditure abroad	96	68	− 632

A 2 per cent increase in personal income, together with a 6½ per cent decline in personal direct taxes, a largely irregular effect resulting from later than usual income tax refunds, produced a 3 per cent rise in personal disposable income and permitted both a 2 per cent advance in personal expenditure and nearly half a billion dollar increase in personal net saving.

Business Gross Fixed Capital Formation

Gross fixed capital formation in the second quarter was running at a seasonally adjusted annual rate of $12.5 billion, some 1 per cent lower than in the first quarter, as increased outlays for housing failed to offset lower expenditures for new plant and equipment.

Expenditures for residential construction rose by 22 per cent between the first and second quarters of 1967. Housing starts, seasonally adjusted and at annual rates, jumped by 76,600 units to a record level of 198,200 units. Housing completions climbed 19,300 units to a level of 136,900 units.

Starts in urban areas dropped from 98,000 units, seasonally adjusted, in January to 92,600 in February, then rose in each of the next three months to a peak of 171,400 units in May. They showed little change in June and then slipped to 151,000 in July.

According to the mid-year review of investment intentions, spending on new housing was expected to reach $2.26 billion, raising housing starts to above the 134,000 of last year. Because of the reduced carryover of incomplete houses into 1967, the number of units completed was expected to be considerably less than the 162,000 last year.

Business outlays on plant and equipment dropped 5.1 per cent between the first and second quarters. Non-residential construction expenditures declined by 5.7 per cent, and outlays for machinery and equipment by 4.5 per cent. Both domestic shipments and imports of producers' non-farm durable goods (other than transportation equipment) dropped in the second quarter. A special factor in the second quarter was the tax change relating to production machinery and equipment. This accounted for about half of the decrease in value of investment in machinery and equipment; in constant dollars the decline was about 2 per cent.

In the first six months of 1967, business outlays for plant and equipment at $10.4 billion were very close to the mid-year investment intentions figure of $10.3 billion.

Non-farm Business Inventories

As in the first quarter, investment in non-farm business inventories contributed very little to the level of economic activity in the second quarter of 1967. Investment in inventories at a seasonally adjusted annual rate was $184 million. From the following table it may be noted that although stocks of manufacturing industries increased, stocks of retailers declined while stocks of wholesalers remained virtually unchanged.

Value of Physical Change in Non-farm Business Inventories

(Seasonally adjusted at annual rates)

	1 Q '67	2 Q '67
	millions of dollars	
Manufacturing	40	248
Durables	88	132
Non-durables	− 48	116
Wholesale	124	12
Retail	108	− 88
"Other" industries	− 96	12
Grand totals	**176**	**184**

Among manufacturing industries, though the accumulation was almost equal at the total level between durable and non-durable goods-producing industries, the change in the rate of increase from the previous quarter was much more pronounced in non-durables, where a shift from liquidation to accumulation took place. A small liquidation in the stocks of electrical and non-metallic industries was more than offset by a general increase in the stocks of other durable goods industries. Among the non-durable goods industries, significant increases in the food, tobacco and petroleum industries handsomely counterbalanced the liquidation which occurred in the stocks of paper and rubber industries.

Classified by level of processing, manufacturing stocks increased at all levels but more evidently in finished goods. With shipments being higher than new orders, the quarter ended with a lower backlog of unfilled orders. The ratio of total stocks-to-shipment was below that of the preceding quarter, but above the average of the past six years.

Stocks of retail trades of both durable and non-durable lines were lower at the total level, partly as a result of a notable increase in retail sales. The substantial accumulation of stocks of non-durables in the previous quarter was reversed and stocks were liquidated with the exception of food. Retailers of non-durable goods reduced their stocks at a faster rate than those of durable goods. Motor vehicle dealers continued to draw down their inventories although at a lower rate than that of the previous quarter. Even so, this liquidation more than offset the total accumulation in the rest of the durable goods trades.

Wholesale trades were also responsible for the moderate investment in stocks in the present quarter, showing almost no change from the previous quarter. A small accumulation in the stocks of durable goods lines which was mainly concentrated in industrial, transportation, commercial, institutional, and service equipment and supplies, was to some extent offset by a small liquidation in the non-durable segment of wholesale trade.

Exports and Imports of Goods and Services

The deficit in Canada's external account, on a national accounts basis, moved from a seasonally adjusted annual rate of $536 million in the first quarter to $660 million in the second. From the following table it may be noted that the change of $124 million resulted from an improvement of $300 million in non-merchandise trade failing to offset a drop of $424 million in the merchandise trade surplus.

Exports and Imports of Goods and Services[1]

(Seasonally adjusted at annual rates

	Goods			Services			Current balance

[1] National Accounts figures do not include estimates of migrant funds and inheritances.

The improvement in the non-merchandise trade can be ascribed to a very large increase in EXPO-oriented tourist and travel receipts. There was as well a sharp drop in travel payments, along with a minor increase in freight and shipping receipts. Offsetting these favourable changes in part, however, was a rise in payments combined with a smaller decline in receipts of interest, dividends and miscellaneous transactions.

The decline in merchandise surplus resulted from an increase in merchandise exports of $88 million compared with a rise of $512 million in merchandise imports.

In exports, gains were made over the first quarter in newsprint, wheat clearances, crude petroleum, non-farm machinery, asbestos, natural gas, iron ore and re-exports. Declines were recorded in lumber, wood pulp, fish, aluminum, nickel, copper, zinc, fertilizers, and farm machinery.

Data are not available to indicate the items which contributed to the increase in imports from the first quarter. It is known that these increases were largely from United States sources.

The Government Sector

Total expenditures of all governments combined, excluding inter-governmental transfers, increased by over 7½ per cent in the second quarter to $21,252 million from the first quarter of $19,728 million. Over half of this increase resulted from higher expenditures on goods and services with the federal and provincial-municipal levels contributing about equally to the rise. At the federal level, higher outlays were made on both defence and non-defence items. The rise in expenditures on goods and services by provincial and municipal governments were in general the result of higher salaries and wages and higher spending on capital goods at the municipal level.

Also, federal transfer payments to other levels of government rose markedly in the quarter. This reflected, in part, changes in the new fiscal arrangements with the provinces which resulted in larger equalization payments. The new arrangements included a system of post-secondary education payments to the provinces which began in the second quarter and overlapped the former system of grants to universities. Payments under the Canada Assistance Plan, which commenced during the second quarter, also contributed to the sharp increase in federal transfer to other levels.

Total revenues of all governments combined increased only slightly from $20,536 million in the first quarter to $20,580 million in the second quarter. However, there were divergent and irregular movements in the components.

Revenues from presonal direct taxes declined by 6½ per cent from the unusually high rate of the first quarter. The irregular movement in this series is partly a reflection of a later start in processing of the 1966 income tax returns, causing a shift in the pattern of refunds from the first to the second quarter.

Revenues from indirect taxes declined by slightly less than 1 per cent. Federal revenues from this source declined by almost 3 per cent, mainly due to changes in the sales tax rate on production machinery and equipment. The federal decline was partially offset by rising provincial-municipal revenues which were affected by higher retail sales tax rates in Quebec and the imposition of a retail sales tax in Manitoba.

Offsetting the declines in revenues from personal direct taxes and from indirect taxes were increased corporation tax liabilities and a sharp rise in investment income, largely due to higher trading profits of federal government enterprises.

With total government spending increasing by over 7½ per cent while government revenues remained virtually unchanged, the government sector as a whole (inclusive of the Canada and Quebec pension plans) moved from a surplus, on a National Accounts basis and seasonally adjusted at annual rates, of $808 million in the first quarter to a deficit of $672 million in the second quarter. Most of the change came at the federal level and resulted, in part, from the irregular movements mentioned above in both the revenue and expenditure series in the first and second quarters.

It should be noted that in a period of such irregularities the averaging process inherent in the seasonal procedure may sometimes not fully reflect the true movement of the current situation. This is particularly true where a series is not seasonally adjusted directly but is obtained as a difference of large, seasonally adjusted aggregates, such as in the case of the surplus or deficit position of government. The deficit at the provincial-municipal level narrowed slightly during the quarter while the surplus of the Canada and Quebec pension plans showed little change.

The Components of Income

Labour Income

During the second quarter of 1967 the total labour income (seasonally adjusted) increased by almost 2 per cent. This compared with an increase of over 2½ per cent in the first quarter of 1967. The goods-producing industries were responsible for this reduced rate of payroll increase, showing little change compared with a 2 per cent rise in the first quarter, while the service-producing industries continued their advance, increasing by over 3 per cent.

The total labour force in the country continued to grow with increasing participation from females and juveniles as well as regular growth increases. The bulk of the increase in the quarter was absorbed by the service industries. The goods-producing industries experienced a decline in employment which was apparent in most of the industries, notably so in manufacturing, construction (especially in the engineering sector), and forestry. This decline in the goods-producing industries was partially offset by increases in average weekly hours worked from a low in the first quarter and by slight increases in average hourly earnings.

Seasonally adjusted, the increase in wages and salaries in the manufacturing industries was 1 per cent and in mining, 3 per cent. However, in construction and forestry they declined by 2½ per cent and 5 per cent respectively. All service-producing industries showed continued increases in wages and salaries, roughly at the rate established in 1966 and in the first quarter of 1967. Lower average weekly wages and salaries in the service-producing industries, relative to the goods-producing industries, affected the lower rate of increase in total labour income in the second quarter.

Corporation Profits

Seasonally adjusted at annual rates, net corporation profits (before taxes and before dividends paid to non-residents) moved ahead to a level of $4.9 billion in the second quarter of 1967. This represents an improvement of 5½ per cent over the first quarter level.

The long pronounced general rise in the level of net profits which commenced in mid-1961 levelled off in the last quarter of 1965 and remained stable through the first half of 1966. After a fall-off in the profit level in the third quarter of 1966, profits rebounded in the fourth quarter, but slipped again in the first quarter of 1967. Second quarter profits moved ahead at a brisk pace, but failed to advance to the high levels that prevailed in the late stages of the upswing in profits.

Within the industry groupings, marked rises were recorded in the transportation storage and communication industry, where subsidies influenced the upward trend, and the retail and service industries, whereas a moderate rise of 5 per cent was experienced in the wholesale trade industry. Profits in the manufacturing and finance industries held virtually steady with changes of less than 1 per cent.

A widespread mixture of rises and declines was scored in the manufacturing group. The strike-affected electrical industry experienced a slight rise in profits but remained at a relatively low level compared with profits achieved in earlier periods. Profits in the textile, wood, non-metallic mineral and miscellaneous categories decreased by more than 12 per cent from their first quarter level, whereas declines in the paper, printing, and petroleum and coal industries were more moderate — 7, 10 and 4 per cent respectively. Offsetting these declines was a step-up in the profit level of the food and beverage industry, with a rise of 12 per cent, metal, 6 per cent, and chemicals, 2 per cent.

Net profits for the first half of 1967 showed a decline of 9 per cent from the corresponding period of 1966. This decline was more pronounced in the first quarter. The advance in capital consumption allowances in the first half of 1967 accounts for greater part of this drop. On a gross basis, corporate profits edged down only 3 per cent.

In the half year comparison, net corporation profits slipped noticeably in the mining, manufacturing, transportation storage and communication, and wholesale trade industries with all showing declines exceeding 10 per cent. Profits in the retail trade industry drifted down 6 per cent. Profit rises were pronounced in the utility and service industries each with gains of over 15 per cent. The finance industry profits rose by 4 per cent.

Total manufacturing half year profits, as noted above, fell off with a large portion of the industries following this pattern. The electrical products industry experienced a significant slump in profits, with the food and beverage, textile, wood, paper, metal, non-metallic mineral, and chemical industries all registering drops of more than 10 per cent. Profits in the rubber, printing, and petroleum and coal industries exceeded their respective first half of 1966 levels.

Rent, Interest and Miscellaneous Investment Income

Seasonally adjusted, rent, interest and miscellaneous investment income rose by 7.4 per cent during the second quarter, reaching a record level of $4,304 million at annual rates. Profits of government business enterprises accounted for $228 million of the total increase of $296 million in the quarter.

Accrued Net Income of Farm Operators

Accrued net income of farm operators from farm production seasonally adjusted showed little change from the first quarter. The value of livestock production increased sharply due mainly to inventory accumulation, while the value of grain production rose slightly. Offsetting these increases was a decline in cash income from the sale of other farm products, mostly the result of a substantial drop in cash income from the sale of tobacco from an irregularly high first quarter.

Net Income of Non-farm Unincorporated Business

Net income of non-farm unincorporated business rose to a seasonally adjusted annual rate of $3,124 million, 5.5 per cent above the first quarter. Higher net incomes in the construction and service industries were mainly responsible for the increase.

Real Gross Domestic Product at Factor Cost

Production by Industry

Seasonally adjusted real domestic product less agriculture for the second quarter of 1967 rose by 1.6 per cent, resuming the quarter-to-quarter upward climb in non-agricultural output that had been interruped by the slight drop that occurred in the first quarter of this year.

The service-producing industries provided the strength shown in the second quarter increase, with the goods-producing industries adding only fractionally to their production.

Within the service industries, trade showed the largest advance, increasing by 4½ per cent. This increase amounted to a contribution of 40 per cent toward the total increase in non-agricultural output. Wholesale trade rose by 6 per cent, while retail trade went up 3½ per cent. Sales by motor vehicle dealers, which rose by 9½ per cent, contributed significantly to the increase in retail trade; most of the other retail components also recorded advances. Many of the components of wholesale trade also increased, recovering from the low levels experienced in the first quarter of this year.

The community, recreation, business and personal service group contributed 21 per cent of the second quarter increase in total output. Production in both the business and personal service groups was apparently increased by EXPO.

The transportation, storage and communication grouping accounted for 18 per cent of the total increase in non-agricultural output. An increase of 3 per cent in this grouping was concentrated mainly in the transportation components. Statistics for the transportation of passengers appear to indicate that travel to and from EXPO was a major factor.

Within the goods-producing industries, mining, with a rise of 3 per cent, contributed 12 per cent to the total increase in non-agricultural output, largely because of a 7½ per cent advance in the mining of crude petroleum.

Manufacturing, in contrast to most quarters, made only a minor contribution, of 9 per cent, to the change in total non-agricultural output. Almost all of this contribution came from the manufacturing of non-durables, chiefly the textile products and foods and beverages components. Although durables-manufacturing as a whole contributed little to the increase in total output for this quarter, the manufacture of motor vehicles rose by 11 per cent.

Electric power and gas utilities rose by 2½ per cent. The contribution of this grouping, of 7 per cent, was divided almost evenly between the two components.

Construction, which was strike-affected, was one of the few industries to show a drop in the second-quarter. This decrease of 1½ per cent, was the result of a 7 per cent fall in public construction. Within the private construction component, a large increase in housing, which represented a recovery to the levels of the first half of 1966, was almost totally offset by a decrease in non-residential construction. The decrease in total construction had only a minor dampening effect on the rise in total non-agricultural output.

LABOUR FORCE (More detail in Table 19)

Employment was 7,442,000 in August, almost unchanged from July. A decline of 18,000 for unemployed and of 17,000 for labour force reflected reduced participation of teenagers who were temporarily in the labour market during the summer months. Unemployment was 4.1 per cent of the labour force.

	total labour force	total employed	employed non-agriculture	unemployed	unemployment rate	not in the labour force

INDUSTRIAL PRODUCTION (More detail in Table 16)

The index of industrial production advanced by 0.9 per cent in July to 283. All three principal components of the index contributed to the gain as mining rose by 0.7 per cent, electric power and gas utilities by 0.9 per cent and manufacturing by 0.8 per cent. The gain in manufacturing originated in durables.

EMPLOYMENT, SELECTED INDUSTRIES (More detail in Table 28)

The index of employment in manufacturing decreased 0.7 per cent to 121.6 in June mainly due to a decline in durable manufacturing. Employment in construction at 117.5 was 2.8 per cent lower, and in trade 0.9 per cent higher at 125.7.

INCOME, EARNINGS AND HOURS (More detail in Tables 18, 34 and 35)

Total labour income moved up $17 million to $2,667 million in June.
Average hourly earnings in manufacturing continued to advance, increasing in June to $2.39.
Average weekly hours in manufacturing were 40.4 hours in June.

CONSTRUCTION (More detail in Tables 67, 72 and 73)

The value of building permits declined 15.8 per cent in July to $315.6 million. The increase in residential permits of 7.5 per cent was offset by a sharp decline of 36.5 per cent in non-residential permits.

Housing starts, with 146 thousand units at annual rates in July, were 3.1 per cent lower than in June. Completions, with 144 thousand units at annual rates, were 17 thousand units or 13.5 per cent higher.

[1] In single dwelling the removal of the $500 winter housing bonus has disturbed the seasonal pattern. Figures are subject to revision.

EXPORTS AND IMPORTS (More detail in Tables 91 and 92)

Exports declined 6.2 per cent in July to $915.7 million due to decreases in exports to the United Kingdom and to All Other Countries of 12.5 per cent and 16.4 per cent respectively.

Total imports at $923.1 million were higher in July, reflecting a large increase in imports from All Other Countries and a minor decrease from the United States.

---

[1] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

New orders in manufacturing increased 2.0 per cent in June. Inventories and unfilled orders showed minor increases, while shipments were almost unchanged.

Cheques cashed in clearing centres decreased 4.6 per cent to 47.1 billion dollars in July.

Consumer Credit was $47 million or 0.8 per cent higher in June.

SELECTED QUARTERLY SERIES (More detail in Tables 7, 11, 69, 70, 71, 75, 90 and 104)

Gross national product increased 2.2 per cent in the second quarter 1967, to 61.5 billion at annual rates. With prices rising, this advance represented a gain of close to 1 per cent in real terms.

Personal disposable income and corporation profits before taxes advanced 3.1 per cent and 5.5 per cent respectively in the second quarter 1967, while Farm Cash Receipts declined 3.9 per cent.

[1] Gross National Product at market prices excluding accrued net income of farm operators from farm production. [2] Before dividends paid to non-residents; see also footnotes on Table 113. [3] Total of all monthly and quarterly series as in column 14, Table 90. [4] Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale index (1935-39 = 100) moved up from 263.7 to 264.6 in August; the thirty industrial materials index eased from 253.0 to 252.0. The index of industrial common stocks (1956 = 100) advanced 2.2 per cent to 189.3.

The consumer price index (1957 = 100) was 0.5 per cent higher in August. The increase was largely attributable to higher food prices, which moved the food index up 1.8 per cent.

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

---

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. Source at bottom of Table 12.

[1] Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. [2] The labour force as a percentage of the population 14 years of age and over. [3] The unemployed as a percentage of the labour force. **Source: Labour Force Bulletin, (71-001), D.B.S.**

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. **Source: The Labour Force, (71-001) D.B.S.**

---

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes also publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

Table 28: employment indexes,[1] by industrial divisions (1961=100) based on the 1960 standard industrial classification

monthly averages	industrial composite[2]	forestry	mining, including milling	manufacturing			construction	transportation, communication and other utilities[3]	trade		finance, insurance and real estate	service[4]

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and public administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D.B.S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

---

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end of December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. Excludes rebottling and intra-industry transfers. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

---

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D. B. S.**

---

[1] End of period. [2] Does not include apartment-type machines. [3] Electric and other. [4] Gas types are included. [5] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. **Sources: Domestic Electric Refrigerators (43-001), Domestic Washing Machines (43-002), D. B. S.**

[1] These totals include all generating agencies producing over ten million kilowatt hours per year. [2] These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3] Less imports. [4] Total net generation less net exports. [5] Mainly the amount used in electric boilers. **Source: Electric Power Statistics, (57-001), D. B. S.**

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. [1] Includes crud oil, condensate and pentanes plus. [2] Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. [3] Gros new production by field and processing plants less field flared and waste, Canadian sources only. [4] By gas utilities, Canadian sources only. **Sources: Crud Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.**

---

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

Note: Components may not add to totals due to rounding differences. [1] The data are collected for 1,400 municipalities and individual figures are available on request. [2] Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. **Source: Building Permits (64-001), D.B.S**

[1] The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

---

[1] Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. [2] Planks and boards, flooring and square timber. [3] Hollow blocks including fireproofing and load-bearing tile. [4] For building insulation only. Figures cover the production of firms which normally account for 90 per cent of the total for Canada. [6] Factory sales of firms which normally account for 96% of otal Canadian production. **Source: Concrete Products (44-002), Products made from Canadian Clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001), Production, Shipments and Stocks on Hand of Sawmills (35-002), (35-003) monthly, (35-204) annual and Trade of Canada, Imports (65-007), Exports (65-004), D. Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up ar based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The tot value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above tabl covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Eve though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S**

---

[1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. **Source: Retail Trade (63-005), D.B.S.**

Table 85: value of retail trade by types of business & provinces, based on the 1960 standard industrial classification – concluded

[1] Department store stocks at end of period at selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by components for the period prior to 1967 are based on the 1951 Census. **Source: Department Store Sales and Stocks (63-002), D.B.S.**

---

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1] Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2] Companies licensed under the Small Loans Act and affiliated compagnies engaged in making personal loans. [3] Cash loans with no conditional sales contract but usually repaid in instalments. [4] Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5] Loans other than secured loans and mortgage loans. [6] Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7] Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8] Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9] Amount owing to oil companies ex commercial accounts. [10] Excludes mortgage loans data available yearly only. [11] The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D.B.S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

[1] Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands. [2] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions. **Source: Trade of Canada Imports (65-007), D. B. S.**

Table 93: merchandise exports by commodities, based on the standard commodity classification[1] (million dollars)

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500, 000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100, 000 or more gross annual operating revenues. [2] Includes Class I carrier only. These are carriers having $100, 000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services a included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100, 000 or more gross annual revenues primarily fr urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Source Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60, 000 annually prior to January, 1964 and over $100, 000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18, 000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commercial Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

[1]Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimate projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2]The monthly Canad totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither th monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3]Total new settled-for ordinary sales in Canad [4]Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartfor Connecticut, U. S. A.**

---

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entir comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the me fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Inclu also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

---

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

A NOTE TO USERS

Table 56 has been expanded to include the numbers of new passenger cars and commercial vehicles. The seasonally adjusted units are now introduced on Page S-5, replacing the value series. The seasonal adjustment of new motor vehicle sales in dollars was discontinued due to changes in the valuation of new motor vehicles applied to sales in 1967, but not to sales in previous years. Statistics of units sold are consistent over time. They have been seasonally adjusted by the X-11 variant of the U.S. Bureau of the Census Method II. A trading-day adjustment based upon the actual variations in the data was applied.

Table 117, has been completely revised and brought up to date. Changes include addition of the Canadian Broadcasting Corporation and Industry Division and two new items identified as "Payments under the Transportation Act" and "Post-Secondary Education Payments to Provinces".

A CENTURY OF ECONOMIC GROWTH*

During the past century, the Canadian economy has been greatly dependent upon external forces. Waves of expansion and growth have tended to coincide with major periods of expansion elsewhere. Throughout this period of progressive development the most characteristic industries have been directed toward the export market. When these have thrived, the economy has thriven also.

While the Act of Confederation may have set the stage for a transcontinental expansion based in the St. Lawrence area, decades passed before this achievement was fully realized. Not until the new century dawned did a conjunction of favourable circumstances in world environment lead to attainment of earlier expectations. As the century progressed, closer relations with the United States economy became a major trend in an industrial age of mass production and consumption, in contrast to earlier east-west concentration on a few staple products for export to Europe.

External capital has always played a significant role in Canadian development. Indeed, scarcity of such capital has often put limits on the pace of Canada's expansion. In a country in which transportation facilities have been a major necessity, requiring large investments, it was natural that a considerable proportion of non-resident capital should have been used to finance canals, roads, railways, etc., and that securities represented borrowing for such purposes. Many productive pursuits carried out during the nineteenth century in small units, such as agriculture and small local industries with local markets, could be largely financed from the savings of individuals and other local sources. But, as industrial development advanced, non-resident capital played a progressively larger part in financing industrial and governmental enterprises.

This change became most evident in the twentieth century with the appearance of new industries, mines and sources of power requiring large investments of capital. Industries exploiting such Canadian resources as pulp and paper, non-ferrous smelting and refining, chemicals, petroleum and mining are all particularly capital-intensive and have drawn heavily upon non-resident sources of capital.

Other capital-intensive industries such as hydro-electric power, originally partly developed by private enterprise, have since become largely government-owned. Many of the secondary industries, for example, automobiles, rubber goods and electrical apparatus, have also been considerably influenced by non-resident capital. On the other hand, such secondary industries as iron and steel, textiles and beverages, are still mainly under Canadian control. Down the years an underlying trend has been to larger units and consolidations with a widening of markets and broader affiliations.

Capital Inflows

Various periods of intensive investment and rapid growth in Canada have been highly dependent upon capital inflows. Some outstanding characteristics of these periods herein described, are largely in a context of capital investment and its sources and the external demands which made expansion possible. In the process of developing into a highly-industrialized economy, Canada has accumulated an exceptionally large balance of external indebtedness.

The total value of externally-owned investments in Canada at the beginning of Confederation was not great, compared with investments in subsequent periods of rapid Canadian expansion. However, such investments constituted a considerable burden for the size of the economy. The value of early non-resident investments is not known precisely, but even by 1900 the total was privately estimated at less than $1,250,000,000. Much of this total appears to have been accumulated during the first three decades following Confederation.

The Canadian provinces had experienced a period of heavy investment activity in the decade of the 1850's with the building of the Grand Trunk Railway which was financed by British capital and was at the centre of the expansion in that period. Other railways were also constructed before Confederation and were financed by capital both from Britain and the United States. Earlier construction of the various canal systems and other public works often had been made possible only by imports of capital from the sale of provincial bonds in London. Indeed, a number of canals, such as the Rideau system, had been constructed by the Imperial Government.

Investments by non-residents in Canadian industry in that early pre-Confederation period tended to be more limited, except for a few special types of activity where non-residents were major entrepreneurs as in the fur trade and in lumbering. The history of the Hudson's Bay Company alone is a record of Canadian development. In fact, one early objective – and result – of Confederation was Canadian Government purchase from the Hudson's Bay Company of Rupert's Land in order to open up the western prairies for settlement. Close business relations with Britain led to many partnerships and other business connections with that country.

In the period between Confederation and the turn of the century the greatest single influence on the rapid rise in non-resident investment in Canada was the building of the Canadian Pacific Railway. This major investment gave rise to a variety of other capital inflows, for example, agricultural and business opportunities and community development which followed the construction of an all-Canadian transcontinental railway. Financing of the railway itself, under construction from the 1870's to 1885, led to very substantial investments from the United Kingdom and, to a lesser extent, from continental Europe and the United States. Other railway construction of the period was also financed by non-resident investors and the Intercolonial Railway was completed in 1876.

---

* This article, written by Mr. C.D. Blyth, Director General of the Economic Accounts Branch, is reprinted from CANADA ONE HUNDRED 1867-1967, the special Centennial volume published by DBS and available from the Queen's Printer or the Bureau, Ottawa, at $2.00 per copy.

Another aspect of National Policy, the introduction of a new tariff in 1879, was also an influence on industrial development and capital inflows. A number of new establishments in manufacturing and trade were set up in Canada in this period by American and other non-resident businesses. New mineral properties were acquired by non-residents and mining began in some areas, as well as operations in the pulp and paper industry. These industries did not yet play an important role in Canadian exports which were still mainly such primary products as lumber, fish, bacon, cheese, etc.

Through much of this post-Confederation period certain influences were pervasive in the general economic background of Canada. Among these were declining prices in Canada and elsewhere and large-scale emigration to the United States. Following the Civil War in the United States, settlement expanded westward and new industries sprang up to supply the growing markets.

The atmosphere of confidence with which the Canadian economy started the period soon changed with the depressive factors noted above which only receded towards the end of the century under the stimulus of an improving world environment with new gold discoveries, recovering exports and prices. It was only towards the end of the century that Prairie development accelerated although the export of prairie wheat had begun earlier on a relatively small scale.

Accelerated Growth

It was not until the early part of the twentieth century that expansion of the Canadian economy on a more massive and concentrated scale occurred. Large infusions of both capital and immigrants provided a basis of rapid growth which was stimulated by rising prices for wheat and reduced costs of transportation as European industrialization created new markets.

This period of accelerated growth accompanying large investments, which came to a peak just before the outbreak of World War I, was rendered possible only by an infusion of foreign capital in unprecedented volume. In this way foreign resources were utilized to an unusually high degree to supplement domestic sources of capital in furthering the development of the Canadian economy. Again, the period was one in which railway construction was important in leading to capital inflows, with the building of two more transcontinental railways and many branch extensions of the main systems. These further reinforced the east-west movements of trade and contributed to the expansion of a transcontinental economy trading with the overseas world.

Much of the expansion accompanied the large and rapid population growth as immigration rose to new high levels and as population shifts within the country occurred with the opening up and development of Western Canada. This movement was encouraged by the growing scarcity of cheaper land in the United States. New borrowings abroad by governments and municipalities to assist in providing for the roads and other infrastructure for the wheat economy occurred in this period. British purchases of Canadian railway, government and municipal securities made up most of the capital inflows, with lesser amounts of Canadian securities being sold in the United States.

In the field of industry, direct investments in branches and subsidiaries controlled abroad continued to make up only a minor part of the totals, although this kind of investment was appearing more frequently than formerly as the economy became more industrialized with wider markets and placed less emphasis on production for local demands in smaller industrial establishments. Although information is incomplete, it has been estimated that, by the turn of the century, there were more than 100 instances of direct United States investments in Canada.

World War I

By the beginning of World War I, apparently partly in response to Canadian tariffs, the number of these direct investments had tripled. In this period the value of Canadian manufacturing more than doubled as did the capital employed, with larger units necessary for developing new industries beginning to appear. Among these were new investments by United States concerns in pulp and paper plants, stimulated by opportunities for free entry into the United States market from 1911 onward, and by restrictions on exports of pulpwood.

Before the War there was also some expansion in non-resident-financed, non-ferrous metal industries. These primary industries, usually based in the Canadian Precambrian region, were to develop rapidly later with technological improvements, new sources of hydro-electric power, and with strong demands for their products in the United States and Europe. Other industries also first appeared in this period. The automobile industry is a significant example of an establishment designed to take advantage of preferential opportunities to export to Commonwealth markets.

World War I was a period of rising activity in both Canadian industry and agriculture. New demands created by the conflict led to full employment of many new facilities developed in the previous decade of rapid growth. War demands prevented readjustments from the preceding boom which had shown some hesitancy in the year before the War began. Canadian industry was able to expand rapidly into new kinds of production for the common Allied effort and to supply the rapidly-growing Canadian market which had been stimulated by new levels of consumption.

Prices also rose rapidly during, and immediately after, the War. Within a few years, exports had doubled in value and later trebled. Increases in shipments of food and war materials to Britain contributed much of this rise but sharp gains in exports to the United States were also very significant as the economy acquired closer links with that country. There was a notable acceleration in investments and in exports of the pulp and paper and non-ferrous metal industries, and a large merchant marine was constructed. Imports from Britain and continental Europe were curtailed, but they increased from the United States. As Canadian industry supplied more Canadian requirements, there was a widening of Canadian markets and an increasing interdependence between the economic regions of the country.

The United States had become a major source of capital and, during the short period of some four years, United States investments in Canada doubled. In contrast, little change occurred in British investments. At the same time, the high income of businesses and individuals in Canada were reflected in increased savings much of which were invested in Victory Bonds. The boom continued for several years after the War but came to an end in 1920 when prices were at their peak level — more than double the general level before the War. A sharp readjustment followed in 1921 with prices falling by about one third. It was not until 1922 and later that general economic recovery again began.

Industrialization of 1920's

A revival of world trade with recovery and monetary stabilization in Europe, assisted by capital from the United States, again created a favourable environment for Canadian exports and development. Once more Canadian growth was outstanding. In the years from 1925 to 1929, exports were again close to the values of 1918 - 1920. As prices were much less in the later period, the volume of trade had risen to new peaks. Wheat prices and acreage under production rose once more with a very large crop in 1928. Business investment, too, again became a source of strength. The Canadian economy was becoming more diversified with the rise to greater prominence of new industries such as pulp and paper, gold, non-ferrous metals, automobiles, electric light and power, and electrical apparatus. Consequently, agriculture decreased somewhat in importance as manufacturing and mining became relatively more important in the latter part of the decade and the service industries gained as well with the growing urbanization of Canada.

Capital exports from the United States to Canada were an important factor in this industrialization of the 1920's. There was a virtual doubling in the value of United States investments in Canada between 1918 and 1926, and a further rise of almost one half in the succeeding four years. This was particularly important in the new industries exploiting the wealth of the Precambrian Shield but it was also widespread in secondary manufacturing, trade and finance. New technologies were imported as well as capital, accelerating the process of industrialization and urbanization.

The new industries included some which were to bring distinction to Canada in the wider front of international industrialization as new metals and materials were required by the United States and other industrial nations. The rapid extensions in the use of electricity and motor transport were also to transform day-to-day life. These changes were the forerunners of even greater industrial transformations to come in later decades. While this influx of United States capital was taking place, Canadian investments abroad were also rising, particularly holdings of United States stocks, as well as Latin American and other foreign bonds.

The 1930's

Canada was particularly vulnerable to the world-wide depression which set in during 1929 and 1930. Being highly dependent upon incomes from a few export staples, the decrease in world trade had far-reaching effects on the Canadian economy. The economic crisis of 1929 and the subsequent depression in the United States had widespread effects on world trade due to curtailments in capital lending. International dislocations were widespread and deep rooted being accompanied by currency readjustments and protective restrictions. In Canada every sector felt the downward pressure between 1929 and 1933 but none more so than did western agriculture. The depression and prolonged drought brought a rapid end to the extended wheat boom. Markets contracted and prices dropped to one quarter of the 1917 - 1920 peak but there was no corresponding drop in costs and overhead.

The impact of these changes forced readjustment that had postponed by shortphased reactions earlier. Investment activity fell off rapidly, contracting to about one quarter of the 1929 level and was not again to reach that peak until the 1940's. Manufacturing activity was sharply reduced. Imports also contracted rapidly and were not to regain the levels of the more prosperous years until World War II, partly because of the low levels of investment in Canada in the 1930's.

Although world trade again began to increase after 1933, recovery in Canada tended to be slow and resources were under-utilized until World War II.

The climate for some of Canada's primary products continued to be unfavourable because of surplus capacity and reduced world demand. Policies of autarchy in Europe, which lessened demand for wheat, are an example. But there was a rising demand for the products of some mineral industries and the growth which occurred in this area became relatively more important.

A major gain occurred in the production and export of gold, stimulated by the higher prices offered since 1934. Exports of the leading non-ferrous metals also were stimulated by armament demands from overseas. Trade agreements between Canada and the United States signed in 1935 and 1938, combined with the general recovery, led to substantial increases in trade with that country in the years immediately before the War, although the short recession in the United States in 1938 was a restraining factor.

Another growing source of Canadian income was the trade from United States tourists as Canada's highways were developed. As imports gained relatively less than exports, there were sizable surpluses in Canada's external current account from 1934 on. These were available for reducing foreign holdings of Canadian securities.

The 1930's was the last period in which the traditional geographical distribution, the "triangular pattern" of Canada's balance of payments, was predominant, unimpeded by the type of international financial dislocations which were to become typical of the 1940's with the War and its aftermath. There were surpluses in Canada's balance of payments with Britain and overseas which could be freely converted to cover deficits with the United States. The unconvertibility of sterling which emerged with World War II meant that it was necessary to introduce new methods of financing Canada's external trade along more bilateral channels.

World War II

The outbreak of World War II in 1939 brought to an end the long period of under-employment of resources. Once again the external environment was to become the determining factor in Canadian development. Soon, scarcity of resources was an overriding element in the shaping of economic policy. Various official controls were introduced affecting production, prices and foreign exchange as well as general military and economic mobilization. Government expenditures as well as policy became increasingly prominent. New kinds of production were introduced and extended while other kinds were reduced by one factor or another. With a curtailment of imports to meet civilian purposes, new opportunities opened up for Canadian manufacturing. Some major industries, of which the automobile industry is an example, were diverted from production for civilian purposes in order to produce military equipment.

As a result of wartime mobilization, a great increase in the total of Canadian production to new high levels was achieved. Within several years, production had doubled in value and remained consistently above this level thereafter. Full employment became the characteristic situation in contrast to the unemployment which had prevailed for such a long period before the War. In the field of agriculture, production was diverted from wheat to dairy products and livestock in order to provide a wider range of food exports to Britain. In industry, production was greatly increased in many commodities which were to be exported — aluminum, nickel, other metals and materials, and in military equipment including aircraft, chemicals, electronic equipment and instruments, and ships. New investment during the period tended to be concentrated in industries producing war materials. By the end of the war, Canada had much more rounded industrial development than formerly and many of the newest types of facilities.

Gross National Product of Canada, 1926 - 65

Year	Millions of current dollars	Year	Millions of current dollars
1926	5,152	1946	11,850
1927	5,549	1947	13,165
1928	6,046	1948	15,120
1929	6,134	1949	16,343

1944	11,850	1964	47,403
1945	11,835	1965	51,996

Mutual Aid

The effect of this wartime economic mobilization was that Canada was able to export a record proportion to Britain and other Allied countries. In the latter years of the War, shipments on Britain's account alone were more than five times as high as exports to that country before the War. This was made possible by a variety of special arrangements including a $700,000,000 loan to the British Government to convert sterling balances accumulated by Canada early in the War. A contribution of $1,000,000,000 to Britain followed. Later, over $2,200,000,000 mutual aid was extended to Britain and other Allied countries. There was also a large-scale official repatriation of many Canadian bonds and other securities held in Britain. By the end of the War, virtually all of the Government of Canada and Canadian National Railway bonds held in Britain had been taken over by Canada. Canada's balance of indebtedness to Britain was considerably reduced, principally by the loan to Britain and the repatriation of securities there. In the same period, the Canadian Government had spent more than $2,500,000,000 on overseas military expense as well.

Commodity flows between Canada and the United States also rose to record proportions during the War, a major influence being the Hyde Park Agreement of April 1941. As a result, new sources of dollar receipts were developed which permitted Canada to specialize in the production of certain types of product required for the War. Sales of aluminum, ships and other war supplies to the United States were particularly large and demand for some civilian commodities expanded greatly. For example, grain shortages led to very large purchases of Canadian grains. Imports from the United States, although swollen by some heavy defence requirements, were curtailed by the prevailing shortages of the period and by the reduced levels of Canadian consumption brought about by temporary wartime restrictions on non-essential imports and by high taxes.

Long-term capital inflows from the United States continued and both portfolio and direct investments in Canada rose, the latter principally by retained earnings. Canada's reserves of United States dollars rose substantially in the latter part of the wartime period. The backlog of demands which had built up during the period of wartime curtailments in consumption was very great in Canada. This was supported by large accumulations of savings. Consequently, there was only a moderate fall in Canadian production in the transition from a wartime to a peacetime economy. Rising consumer expenditures and a revival of many types of business investment, including the accumulation of stocks, were factors of strength during the period in which government expenditures were being reduced and the composition of production and exports were undergoing alteration.

During 1946, the removal of price and other controls progressed, including the return in mid-year of the Canadian dollar to parity with the United States dollar. Prices rose substantially until the level stabilized temporarily during 1948 was reached. Further substantial rises were to follow in 1950 and thereafter under the world-wide impetus of price increases during the Korean war.

Assistance Programs

Canada continued to extend generous assistance to the overseas world in the early postwar period. There were exceptionally heavy demands for commodities overseas but, to make high exports possible, financial aid was necessary. The early Canadian postwar program of assistance to overseas countries was greater than that of any other nation on a per capita basis. The postwar loan to Britain of $1,250,000,000 was a prominent part of this assistance which totalled over $1,800,000,000 including export credit loans to other countries.

Canadian financial assistance to overseas countries had the effect of reducing Canada's own capacity to cover Canadian external purchases concentrated in the United States. At first, imports dropped due to a world-wide scarcity of commodities in civilian demand and the end of trade in war materials, but by 1947 imports from the United States were rising rapidly. As there was less convertible exchange available because of the loans, Canada was able only to meet current expenditures in the United States, first by drawing heavily upon the official reserves accumulated in the wartime period, and later by introducing an emergency exchange conservation program.

Oil Discovery

One of the most important economic events in Canada during the early postwar period was the discovery of oil at Leduc, Alberta. This ushered in a most significant development of a natural resource with many consequences for Canada's national income and balance of payments. It led to a long period of sustained investment activity arising from the exploration and development of petroleum and the increased diversification of the whole nation as well as the region in which the oil was discovered. Development of this new, important source of energy was to sustain and accumulate capital inflows for investment in Canada, at first by United States companies, but later by overseas companies as well. Originally, the new production was used in Canada but later, with the construction of pipelines, it also became a major export to the United States in addition to natural gas, a by-product.

This development of a Canadian resource by United States capital is perhaps the best example of a whole series of new U.S. investments in Canada – a series which expanded greatly in the decade of the 1950's and drew Canada farther into the world of international corporate business. Many of these investments were for the purpose of supplementing United States resources of industrial materials by developing nearby Canadian resources as well, and required large imports of capital by international corporations. The cumulative effect of this type of activity and other forms of more domestically-oriented expansion led to the great investment boom in the 1950's.

New Industries

In addition to petroleum and natural gas, the more outstanding new industries developed by international capital in this period included the massive investments in iron ore mining in Quebec and Labrador, the development of petrochemical and other chemical industries. Enlargements in such basic industries as aluminum, nickel and other non-ferrous metal mining and smelting and pulp and paper have also depended heavily upon foreign sources of capital.

The uranium industry was another major new mining development undertaken on a massive scale in response to United States needs, with some assistance from British capital. Investments in another source of energy, electric power, have also been outstandingly large, including large developments of power at the time of the construction of the St. Lawrence Seaway. Investments in many secondary industries during the 1950's and 1960's were also impressive. Characteristic industries of the period which grew rapidly were electronics, synthetic fabrics and materials. The capacity of the iron and steel industry was expanded greatly with Canadian capital, making Canada much less dependent upon imports of steel than in the earlier part of the 1950's. The automobile industry and many others were expanded to supply a growing Canadian market as well as to meet the new opportunities for exporting which opened up in the 1960's.

Increased Government Investment

Investments by governments have also been increasing substantially as the social capital needed to support a larger population stimulated by heavy immigration as well as natural increase, and a more industrial urban economy has been catching up with the private investment which was concentrated earlier. Such investments, too, have been partly financed by capital inflows, usually borrowings in the United States by junior governments and government enterprises.

Growth was rapid and sustained with few interruptions in most of the decade of the 1950's. In its rate, and in the extent to which it was supported by non-resident sources of capital, this period of growth had its nearest counterpart in the great expansion of the wheat economy before World War I. But it was more of an extension of the frontiers in depth bringing with it a much needed diversification to the Canadian economy as Canada moved farther into the age of mass production and mass consumption with rising living standards.

Postwar developments have greatly increased the relationships between the Canadian and United States economies. Higher proportions of Canadian trade are now with the United States than in any earlier period. The capital markets of the two countries are more closely linked than ever before with increasing mobility of capital. The close corporate relations between so many of the business firms in the two countries have tended to draw Canadian business into the milieu of the neighbouring country. A wider use of imported technology is also increasing interdependence.

U.S. Investment Capital

The United States has been the principal source of external investment capital for Canada since the 1920's and that country has a much larger investment stake in Canada than in any other country, with the total invested having more than doubled in less than a decade. United States investments in Canada are particularly prominent in industry. Close communications and transportation have also greatly increased contacts between the two countries. The complexity and interrelationships in the business environment have also been extended by the increasing size of business organizations and a tendency for large enterprises to grow and widen their spheres of activities.

The period of rapid growth was interrupted towards the end of the decade of the 1950's by a series of years of only modest over-all gains in output. These years were characterized by the apparent existence of a considerable degree of over-capacity in many industries which had been expanded so rapidly in the postwar years. The extent of under-utilized resources in the economy was most evident in the chronically high rate of unemployment which persisted until the early years of the 1960's. An anomaly of this period was the large current account deficits which continued after the period of rapid growth which extended up to 1956. Once again some of the difficulty could be traced to the external environment. This time the United States also was in a period of slow growth and to this was added an apparent decline in Canada's international competitive position with an exchange rate which was a deterrent to exporting at a time that supplies of many commodities exported by Canada were growing outside of Canada. This was a period during which the slow progress in North America contrasted with more rapid growth in economies elsewhere, particularly in continental Europe. In addition Canada experienced a financial crisis in 1962 which, being one of confidence, was short-lived.

Increased Expansion

North American expansion again got under way in the early part of the decade and by the middle of the 1960's Canada, in common with the United States, had enjoyed over four years of expansion. This growth in Canada was at a somewhat higher rate than in the United States, with greater increases in exports accompanying the new exchange rate, established in May 1962, higher population increases, and a relatively larger volume of investment. With an apparently improved competitive position, Canada became less dependent upon the United States for capital than in the previous decade. The greatly-reduced current account imbalance of 1963 and 1964 was partly due to large sales of grain to Communist countries as well as to the improved international competitive position and the widespread expansionist environment in the principal industrial nations.

Investment activity in the mid-1960's has once more reached new peak levels both in the public and private categories. Among the more spectacular projects under way to meet external demands, and often with non-resident capital, are those in potash mining, and other chemicals, and new large expansions in non-ferrous metals, pulp, and electric power. An increasing amount of domestic capital is being invested in schools, universities and other institutions, and in housing.

The century of progress which has been briefly outlined here has revealed a transition in Canada from a relatively small economy still disunited, depending mainly on the production of agricultural and other primary staples for local consumption and export overseas into a highly-developed, increasingly-urban industrial nation with growing contacts with the United States and the rest of the world. First, a relatively simple transcontinental economy trading mainly with the overseas world became viable with the great rise in wheat production. This was followed by the development of a new range of large-scale industries based mainly on forest, mineral resources, and electric power supplying United States and other industrial countries with industrial materials, and the domestic industries producing for a growing internal market stimulated by mass consumption brought about by high living standards.

However, certain common factors have remained in the background throughout the century. The external environment continues to be a leading influence upon the health of the Canadian economy for, although Canadian production has all the diversity of an industrial nation. Canadian exports continue to be unusually concentrated in large portions of the production of a number of Canadian commodities. When external demand for Canada's surpluses which must be exported are strong and sustained, there is a reflection in Canadian activity, and when increased new capacity to meet the rising demands is needed on a large scale, expansion in the Canadian economy takes on dominating proportions. Examples of this type of growth occurred in the decade before World War I with the opening up of the West and, during the decade following World War II, with the development of mineral and power resources and rapid urbanization.

Other concentrations of rapid growth have occurred during the two world wartime periods during which the Canadian economy was fully employed, and the periods in the 1920's and 1960's when United States activity and world trade were rising strongly, and new facilities to meet rising demands, both internal and external, were being extended.

LABOUR FORCE (More detail in Table 19)

Employment declined by 56,000 to 7,386,000 in September. Unemployment remained virtually unchanged at 315,000, or 4.1 percent of the labour force.

EMPLOYMENT DECLINED BY 56,000 TO 7,386,000 IN SEPTEMBER. UNEMPLOYMENT REMAINED VIRTUALLY UNCHANGED AT 315,000, OR 4.1 PERCENT OF THE LABOUR FORCE.

INDUSTRIAL PRODUCTION (More detail in Table 16)

The index of industrial production advanced by 0. 4 percent in August to 284. 2 (1949=100). All of the gain was contributed by manufacturing, which rose by 0. 7 percent, as mining and electric power and gas utilities fell by 0. 6 and 0. 2 percent respectively. About two third of the increase in manufacturing originated in durables.

THE INDEX OF INDUSTRIAL PRODUCTION ADVANCED BY 0. 4 PERCENT IN AUGUST TO 284. 2 (1949=100). EMPLOYMENT, SELECTED INDUSTRIES (More detail in Table 28)

The index of employment in manufacturing at 123.5 (1961=100) was 1.8 percent higher in July, reflecting an increase of 3.4 percent in durable manufacturing and a moderate decrease in non-durables. Employment in services, transportation and construction showed declines of 0.9 percent, 1.0 percent and 1.5 percent respectively.

THE INDEX OF EMPLOYMENT IN MANUFACTURING AT 123.5 (1961=100) WAS 1.8 PERCENT HIGHER IN JULY, REFLECTING AN INCREASE OF 3.4 PERCENT IN DURABLE MANUFACTURING AND A MODERATE DECREASE IN NON-DURABLES. EMPLOYMENT IN SERVICES, TRANSPORTATION AND CONSTRUCTION SHOWED DECLINES OF 0.9 PERCENT, 1.0 PERCENT AND 1.5 PERCENT RESPECTIVELY.

[1] In single dwelling the removal of the $500 winter housing bonus has disturbed the seasonal pattern. Figures are subject to revision.

EXPORTS AND IMPORTS (More detail in Tables 91 and 92)

Total exports declined to $909.3 million in August. Exports to the United States and to All Other Countries declined 0.9 and 3.1 percent respectively, while exports to the United Kingdom increased 6.7 percent.

Total imports at $882.8 million decreased in August, as an increase in imports from the United States was offset by lower imports from the United Kingdom and from All Other Countries.

[1] The effect of the delay in the receipt of customs import documents has been adjusted for the period April 1966- June 1967 for total imports, total trade with the United States, the United Kingdom and Other Countries.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

New orders in manufacturing advanced 4.7 percent to $3,263 million and unfilled orders rose 3.3 percent to $3,877 million. Inventories and shipments increased 1.2 and 2.0 percent to $6,754 million and $3,140 million respectively.

Rail revenue freight loaded declined 4.2 percent to a low of 14.1 million tons.

Cheques cashed in Clearing Centres increased 2.7 percent to 48.4 billion dollars.

NEW ORDERS IN MANUFACTURING ADVANCED 4.7 PERCENT TO $3,263 MILLION AND UNFILLED ORDERS ROSE 3.3 PERCENT TO $3,877 MILLION. INVENTORIES AND SHIPMENTS INCREASED 1.2 AND 2.0 PERCENT TO $6,754 MILLION AND $3,140 MILLION RESPECTIVELY.
RAIL REVENUE FREIGHT LOADED DECLINED 4.2 PERCENT TO A LOW OF 14.1 MILLION TONS.
CHEQUES CASHED IN CLEARING CENTRES INCREASED 2.7 PERCENT TO 48.4 BILLION DOLLARS.

[1] Total of all series available monthly as in column 10, Table 90.

SELECTED QUARTERLY SERIES (More detail in Tables 7, 11, 69, 70, 71, 75, 90 and 104)

In the third quarter, construction starts of dwelling units were 178 thousand units at annual rates, a decline of 10. 0 percent from the second quarter. Completions at 163 thousand units at annual rates were 19. 0 percent higher, while dwelling units under construction were 5. 3 percent higher at 102 thousand units.

IN THE THIRD QUARTER, CONSTRUCTION STARTS OF DWELLING UNITS WERE 178 THOUSAND UNITS AT ANNUAL RATES, A DECLINE OF 10. 0 PERCENT FROM THE SECOND QUARTER. COMPLETIONS AT 163 THOUSAND UNITS AT ANNUAL RATES WERE 19. 0 PERCENT HIGHER, WHILE DWELLING UNITS UNDER CONSTRUCTION WERE 5. 3 PERCENT HIGHER AT 102 THOUSAND UNITS.

[1] Gross National Product at market prices excluding accrued net income of farm operators from farm production. [2] Before dividends paid to non-residents; see also footnotes on Table 113. [3] Total of all monthly and quarterly series as in column 14, Table 90. [4] Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale index was steady in September, while the index of 30 industrial materials was again slightly weaker. The index of industrial common stocks (1956=100) moved up from 189.3 to 190.4.

The consumer price index (1949=100) eased lower to 150.7 in September, mainly attributable to a 1.8 percent decline of the food index. Indexes of non-durables excluding food, durables and services showed increases.

THE GENERAL WHOLESALE INDEX WAS STEADY IN SEPTEMBER, WHILE THE INDEX OF 30 INDUSTRIAL MATERIALS WAS AGAIN SLIGHTLY WEAKER. THE INDEX OF INDUSTRIAL COMMON STOCKS (1956=100) MOVED UP FROM 189.3 TO 190.4.

THE CONSUMER PRICE INDEX (1949=100) EASED LOWER TO 150.7 IN SEPTEMBER, MAINLY ATTRIBUTABLE TO A 1.8 PERCENT DECLINE OF THE FOOD INDEX. INDEXES OF NON-DURABLES EXCLUDING FOOD, DURABLES AND SERVICES SHOWED INCREASES.

---

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

---

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. Source at bottom of Table 12.

---

[1] Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. [2] Th labour force as a percentage of the population 14 years of age and over. [3] The unemployed as a percentage of the labour force. **Source: Labour Force Bulletin, (71-001), D.B.S.**

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing th seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discre ancy. **Source: The Labour Force, (71-001) D.B.S.**

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes also publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and public administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D. B. S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end of December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. Excludes rebottling and intra-industry transfers. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

[1] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [2] 100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. [3] Customs exports. [4] Mill shipments destined for export. **Sources: Pulpwood Production (25-001), Trade of Canada, Exports (65-004), D. B. S; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.**

---

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D.B.S.**

---

[1] End of period. [2] Does not include apartment-type machines. [3] Electric and other. [4] Gas types are included. [5] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. **Sources: Domestic Electric Refrigerators (43-001), Domestic Washing Machines (43-002), D. B. S.**

[1] These totals include all generating agencies producing over ten million kilowatt hours per year. [2] These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. [3] Less imports. [4] Total net generation less net exports. [5] Mainly the amount used in electric boilers. **Source: Electric Power Statistics, (57-001), D. B. S.**

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. [1] Includes crude oil, condensate and pentanes plus. [2] Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. [3] Gross new production by field and processing plants less field flared and waste, Canadian sources only. [4] By gas utilities, Canadian sources only. **Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.**

---

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

Note: Components may not add to totals due to rounding differences. [1] The data are collected for 1,400 municipalities and individual figures are available on request. [2] Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. **Source: Building Permits (64-001), D. B. S.**

---

[1] The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S.**

[1] These indexes are available for January, April and August only. [2] Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. [3] Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. [4] Barley No. 1 feed; hogs grade "B" alive. [5] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. [6] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. [7] Quotations refer to steers of all weights. [8] Grade "B1" hogs. **Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.**

---

[1] Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted. [2] Includes stocks held by manufacturers, wholesalers and other warehouses. [3] Many mills were operating at more than the standard 26 working days in the month. [4] Includes solid, coated, bulk, packages and novelties. [5] Includes beef stews and boiled dinners. [6] Includes tomato sauce, sauces for meat and fish and sauces, other. **Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations, (32-017), Miscellaneous Food Preparations (32-018), Monthly production of soft drinks (32-001), Monthly Meat and Meat Preparations, D.B.S.**

---

[1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. **Source: Retail Trade (63-005), D.B.S.**

Table 85: value of retail trade by types of business & provinces, based on the 1960 standard industrial classification – concluded

[1] Department store stocks at end of period at selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by components for the period prior to 1967 are based on the 1951 Census. **Source: Department Store Sales and Stocks (63-002), D.B.S.**

Note: Components may not add to totals due to rounding. [1] Fully secured by marketable bonds and stocks. Excludes loans to finance the purchase of Canada Savings Bonds. [2] Includes loans on the security of household property. [3] Includes loans to finance companies which are affiliates of retail merchandisers. [4] Religious, educational, health and welfare institutions. [5] Not available on a monthly basis. [6] Differs from general loans in Table 106 by the exclusion of loans to instalment finance companies. **Sources: Statistical Summary of the Bank of Canada and Dept. of Finance.**

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1]Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2]Companies licensed under the Small Loans Act and affiliated compagnies engaged in making personal loans. [3]Cash loans with no conditional sales contract but usually repaid in instalments. [4]Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5]Loans other than secured loans and mortgage loans. [6]Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7]Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8]Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9]Amount owing to oil companies ex commercial accounts. [10]Excludes mortgage loans data available yearly only. [11]The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D.B.S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

---

[1] Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands. [2] The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some $60 millions. **Source: Trade of Canada Imports (65-007), D. B. S.**

[1] The trade figures have been adjusted to reflect more closely the timing of transactions, and to exclude commodities which are covered elsewhere or are not pertinent for balance of payments purposes. [2] Includes government transactions, n.o.p., personal and institutional remittances, miscellaneous income, insurance transactions and business services.

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500, 000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100, 000 or more gross annual operating revenues. [2] Includes Class I carriers only. These are carriers having $100, 000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services are included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100, 000 or more gross annual revenues primarily from urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Sources: Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60, 000 annually prior to January, 1964 and over $100, 000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18, 000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

---

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does no include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements mad under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commercia Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

---

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

---

[1] Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimate projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2] The monthly Canad totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither th monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3] Total new settled-for ordinary sales in Canada [4] Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford Connecticut, U. S. A.**

---

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to ne profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of al companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated i Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirel comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the meta fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Include also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

---

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. [6] Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

Note: The monthly data do not add to the annual totals which include supplementary payments arising from the closing of the accounts. [1] This statement does not include any disbursements other than regular budgetary expenditures. Excluded, for example, are all government outlays arising from increases in loans, advances and investments. [2] Under the Technical and Vocational Training Assistance Act. [3] These payments have been transferred under post-secondary education payments to provinces. [4] Government contributions under the Hospital Insurance and Diagnostic Services Act. [5] Includes treatment and rehabilitation services.

A NOTE TO USERS

Revisions and Modifications:

Table 11: Disposition of personal income.

Personal saving in farm inventory change and personal saving excluding farm inventory change, are no longer available on a seasonally adjusted basis.

Table 13: Government revenue.

A new series "Canada Pension plan" has been added under Investment Income.

Table 52: Garment shipments.

With this issue this table has been revised and expanded. For some items detail series have been replaced by totals, such as cotton blouses, and rayon and rayon mixtures blouses series are now blouses series.

Table 83: Manufactured food.

The series relating to edible oils have been expanded to provide shipments and month-end stocks for shortening and salad oils commencing January 1967. Data for previous years are not shown because of discontinuities caused by changes in coverage. The baking powder series is no longer available. Wheat flour production has been revised from April 1965 to introduce final figures.

Annual Subscription: $5.00 — Single copy: 50c.

EXPORT CREDITS AND OTHER GOVERNMENT OF CANADA LONG-TERM INVESTMENTS ABROAD[1]

A new item of prominence in Canada's international accounts in recent years has been large net outflows of capital from Canada arising from loans and advances under government programmes related to the financing of Canadian exports. These credits have covered both agricultural produce, especially to Sino-Soviet countries, and a wide range of capital equipment exported to developing countries, particularly those in Latin America and the Commonwealth.

Long-term[2] export credits extended by Canada, directly or indirectly under guarantee or at risk of the Government of Canada, as measured for balance of payments purposes, totalled more than one billion dollars in the five years ending with 1966. There were also substantial repayments in this period but the amount outstanding rose to $641 million from somewhat over a $100 million five years earlier.

The series which appear in the accompanying statement cover all the long-term credits extended from Canada directly or indirectly at risk of the Government of Canada. Included therefore, are amounts receivable in Canada under the normal export insurance program authorized by Section 14 of the Export Credits Insurance Act, as well as receivables coming under Sections 21 and 21 A which provide respectively for insurance of large amounts at risk of the Consolidated Revenue Fund and for long-term financing of export sales and related engineering and technical services. Other amounts which are included in the series cover exports on credit terms by other crown agencies and departments.

Credit in connection with the sale of wheat to Sino-Soviet countries has played an important part in the totals. In general, terms of this financing tend to be reasonably short, ranging between 18 and 36 months. From time to time the series have been affected by the irregular nature of repayments when some of the importing countries have chosen to prepay substantial portions of their indebtedness in advance of the due date.

At the end of 1966, the total amount outstanding on account of export credits extended from Canada directly or indirectly at risk of the Government of Canada was placed at $641 million, of which $399 million related to wheat and assorted flour contracts. Further small amounts had been re-discounted abroad and had therefore involved no capital export from Canada although a contingent liability existed in respect of them.

The financing for these credits came from a variety of sources. Substantial amounts of the long-term credits provided under Section 21 A have been sold to the Export Finance Corporation of Canada, Ltd. and the net financing provided by crown agencies and departments was $380 million. The remaining $261 million was provided by the private sector.

Canadian government assistance abroad takes a number of other forms in addition to the provision of export financing and guarantees. These include Canada's official contributions which rose from a low of about $36 million in 1962 to $167 million in 1966 amounting in all, over the five year period, to $429 million. (Additional amounts in the form of regular and special assessments are paid to international agencies of which Canada is a member.) None of these payments creates financial claims on non-residents.

Additionally, Canada has had a number of programmes of loans to national governments and has invested in the capital of international investment agencies. Loans made by the Government of Canada to other governments have been relatively small in the last five years totalling $24 million. These outlays were all to sterling area countries. Some part of them represented advances made to India in Connection with the purchase of aircraft, but in the more recent years they have represented extensions of credit under the new development or "soft" loan programme which complements the existing structure of Canada's foreign aid programme. These are loans administered by the External Aid Office and can be for a period as long as 50 years. Normally there are 10 years of grace before the first repayment becomes due and no interest is payable except for an annual "service charge" of 0.75 per cent. Soft loans must be spent on Canadian goods and services and are designed to help finance projects for which commercial financing is unavailable. The program was initiated in November 1964 but no amounts were disbursed until 1965. Large amounts have been earmarked for specific projects under this development loan program principally to Commonwealth countries with amounts going also to Latin American countries. In general, loans to Commonwealth countries have been negotiated directly on an intergovernmental basis while those to Latin America are handled through the Inter-American Development Bank.

The new loans made by the Government of Canada have been dwarfed by repayments of earlier loans in the five year period. These totalled $198 million including very substantial accelerated repayments made in 1962 which served to ease Canada's international financial position at that time. By the end of 1965 the outstanding balance on the loans of nearly $2,500 million extended by

---

[1] Prepared in the Balance of Payments Division, by Mr. E.B. Carty, Director.

[2] While long-term under balance of payments conventions, that is extending for a period of more than one year, significant parts of these credits would in commercial parlance be recorded as medium-term.

Canada since the beginning of World War II, amounted to about $1,350 million (including amounts of interest, payment of which had been deferred by the United Kingdom). By far the largest element in this total was the 1946 loan to the United Kingdom. Inactive loans on which payments were overdue amounted to $80 million including $32 million of inter-governmental loans made in the inter-war years.

This listing does not exhaust the long-term investment abroad by the Government of Canada and its agencies. Canada holds about $7 million of securities of the United Nations, representing financing of that organization and holds $155 million of medium-term non-marketable United States government securities representing employment of part of the proceeds of receipts under the Columbia River Treaty. It has about $25 million of United States dollar obligations of the International Bank for Reconstruction and Development which it acquired in order to conform to the understanding between Canada and the United States with respect to Canada's exchange reserve position. Both the Canadian National Railway and Polymer Corporation have important investments related to their operations outside Canada. Among other government investments in long-term forms have been the subscriptions paid by Canada to the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation and the Asian Development Bank. Canadian subscriptions of these agencies during the five year period have amounted to $43 million.

---

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. [2] Includes logging, fishing, trapping and hunting. [3] Includes mechanical and construction. [4] Includes a small number in non-specified occupations. [5] Does not include students entering Canada on students' visas. [6] Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. **Source: Quarterly Bulletin, Department of Manpower and Immigration.**

---

[1] Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. [2] Includes residual error of estimate. **Source at bottom of Table 12.**

[1] See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. [2] Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. **Source: The Labour Force, (71-001) D.B.S.**

---

[1] In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. [2] The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. [3] Includes miscellaneous manufacturing industries. [4] Includes also publishing and allied industries. [5] Includes also the storage and communication industries. **Source: Labour Gazette, Department of Labour.**

*Revised monthly data will be available later.

[1] The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. [2] Excludes agriculture, fishing, trapping and public administration and defence. [3] Includes storage, electric power, gas and water utilities. [4] Excludes domestic service. **Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.**

[1] See footnotes 1 and 2 and source in Table 28. [2] Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. [3] In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. [4] Except machinery and transportation equipment industries.

Table 31: average weekly wages and salaries,[1] by industrial divisions, based on the 1960 standard industrial classification-(dollars)

monthly averages	industrial composite	forestry	mining, including milling	manufacturing			construction	transportation, communication and other utilities	trade		finance, insurance and real estate	service
				total	non-durable goods	durable goods			wholesale	retail

[1] The data for the current year are subject to revision. [2] Includes gold. [3] Consists of general wholesale index less animal products and vegetable products component groups. [4] Consists of iron products and non-ferrous metals products component groups less gold. [5] These two series comprise the general wholesale index. [6] Excludes gold. **Source: Prices and Price Indexes (62-002), D. B. S.**

[1] Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

[1] Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. [2] Total manufacturing inventory owned by manufacturers including warehouse stocks. [3] Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. [4] End of period. Annual figures for inventories and unfilled orders are end of December values. **Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.**

---

[1] Tax-paid withdrawals of tobacco products for consumption in Canada, as indicated by the sale of excise revenue stamps. [2] Includes smoking and chewing tobacco. [3] Includes smoking, chewing and twist tobacco. [4] Stocks of redried domestic and imported leaf at end of quarter. [5] The production of beer is shown in thousand barrels of 25 gallons each. [6] Includes bottling of imported liquors. Excludes rebottling and intra-industry transfers. [7] End of period; spirit stock balance remaining in bond for all Canada plus distillery stock in process of being manufactured. **Sources: Quarterly Stocks and Consumption of Unmanufactured Tobacco (32-014), D. B. S.; and Department of National Revenue.**

[1] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [2] 100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. [3] Customs exports. [4] Mill shipments destined for export. **Sources: Pulpwood Production (25-001), Trade of Canada, Exports (65-004), D. B. S; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.**

---

[1] Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. [2] Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. [3] Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. [4] Excluding shipments for re-processing at maker's own plant. **Source: Primary Iron and Steel (41-001), D. B. S.**

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. [1] Includes crude oil, condensate and pentanes plus. [2] Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. [3] Gross new production by field and processing plants less field flared and waste, Canadian sources only. [4] By gas utilities, Canadian sources only. **Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.**

---

[1] Barrels of 35 Canadian gallons. [2] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [3] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [4] Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. [5] Includes inventories at end of period being held at gas plants and in storage caverns. [6] Includes stove oil, kerosene and tractor fuel. [7] Includes aviation gasoline and aviation turbo fuel. [8] Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. [9] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. **Source: Refined Petroleum Products (45-004), D. B. S.**

Note: Components may not add to totals due to rounding differences. [1]The data are collected for 1,400 municipalities and individual figures are available on request. [2]Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. **Source: Building Permits (64-001), D.B.S.**

---

[1]The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. **Source: Building Permits (64-001), D.B.S.**

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. [2] End of period. **Source: New Residential Construction (64-002), D. B. S.**

---

[1] Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. [2] Planks and boards, flooring and square timber. [3] Hollow blocks including fireproofing and load-bearing tile. [4] For building insulation only. [5] Figures cover the production of firms which normally account for 90 per cent of the total for Canada. [6] Factory sales of firms which normally account for 96% of total Canadian production. **Source: Concrete Products (44-002), Products made from Canadian Clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001), Production, Shipments and Stocks on Hand of Sawmills (35-002), (35-003) monthly, (35-204) annual and Trade of Canada, Imports (65-007), Exports (65-004), D. B. S.**

[1] Cash receipts from farming operations excluding supplementary payments. Excludes Newfoundland. [2] Represents participation payments made by the Canadian Wheat Board direct to producers on crops delivered in previous years. [3] Includes rye, flaxseed, rapeseed, soybeans and corn. [4] Includes clover and grass seed, hay, clover, greenhouse products, mustard seed, sunflower seed, hops, dry beans and dry peas and miscellaneous products. [5] Made under the authority of the Agricultural Stabilization Act. **Source: Farm Cash Receipts (21-001), D. B. S.**

Note: Components may not add to totals due to rounding. [1] The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. [2] Excluding trucks. [3] The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. **Source: Farm Implement and Equipment Sales (63-009), D.B.S.**

---

[1] These indexes are available for January, April and August only. [2] Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. [3] Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. [4] Barley No. 1 feed; hogs grade "B" alive. [5] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. [6] Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. [7] Quotations refer to steers of all weights. [8] Grade "B1" hogs. **Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.**

---

[1] Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. [2] Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

Source: Retail Trade (63-005), D.B.S.

[1] Department store stocks at end of period at selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by component for the period prior to 1967 are based on the 1951 Census. **Source: Department Store Sales and Stocks (63-002), D.B.S.**

---

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. [1]Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. [2]Companies licensed under the Small Loans Act and affiliated compagnies engaged in making personal loans. [3]Cash loans with no conditional sales contract but usually repaid in instalments. [4]Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. [5]Loans other than secured loans and mortgage loans. [6]Figures for dates other than year-end are estimated on the basis of loans made by sixteen companies. [7]Sum of instalment credit of clothing, hardware and jewellery stores, fuel dealers and "all other trades" in Table 89. [8]Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 89. [9]Amount owing to oil companies ex commercial accounts. [10]Excludes mortgage loans; data available yearly only. [11]The data for Quebec savings banks loans and motor vehicle dealers are not seasonally adjusted as no seasonality is present; these series are repeated in the unadjusted form. **Sources: Credit Statistics (61-004), D.B.S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.**

[1] The trade figures have been adjusted to reflect more closely the timing of transactions, and to exclude commodities which are covered elsewhere or are not pertinent for balance of payments purposes. [2] Includes government transactions, n. o. p., personal and institutional remittances, miscellaneous income, insurance transactions and business services.

[1] Monthly averages for 1965 and 1966 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of $500,000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. [3] Includes traffic interchanged between Canadian railways. **Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D. B. S.**

[1] Includes Class I and Class II carriers only. These are trucking firms having $100,000 or more gross annual operating revenues. [2] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services are included. Revised figures to December 1963 only. [3] Includes Class I carriers only. These are carriers having $100,000 or more gross annual revenues primarily from urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. **Sources: Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D. B. S.**

[1] Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. [2] Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over $60,000 annually prior to January, 1964 and over $100,000 annually since. [3] United States and other foreign carriers. Excludes in transit passengers. [4] Cargo includes air freight and express but excludes mail and excess baggage. [5] Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs. **Source: Civil Aviation (51-001), D. B. S.**

[1] The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation.The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. [2] In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. **Source: Commercial Failures (61-002) Quarterly, D.B.S.** *167,333 **258,935 ***108,631

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Mainly deposits of foreign banks. [3] Capital, rest fund and undivided profits as at the latest fiscal year-end. [4] Including issues payable in foreign currency. [5] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [6] Excluding Canadian day to day loans. [7] Loans to grain dealers and exporters. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. [10] Including loans to instalment finance companies. **Source: Statistical Summary of Bank of Canada.**

---

[1] Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimate projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. [2] The monthly Canad totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither th monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. [3] Total new settled-for ordinary sales in Canada [4] Under new or amended contracts. **Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford Connecticut, U.S.A.**

[1] The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to ne profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of a companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated i Canada (excluding government-owned companies). [2] As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirel comparable with data where the establishment is the reporting unit. [3] Includes also the furniture and furnishings industry. [4] Includes the primary metal, the met fabricating, the machinery and the transportation equipment industries. [5] Includes tobacco products, leather and miscellaneous manufacturing industries. [6] Include also storage and communication industries. [7] Includes agriculture, forestry, fishing and construction. **Source: Corporation Profits (61-003), D. B. S.**

---

[1] The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. [2] Stocks included in the mining index are for producing mines. [3] Combines the industrials, utilities and finance common stocks. [4] Stocks included in industrial mines are for companies whose operations include smelting and refining. [5] The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. [6] Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. **Source: Prices and Price Indexes (62-002), D.B.S.**

---

[1] This statement does not include any receipts other than regular budgetary revenues. Excluded for example, are all receipts arising from payments of loan and advances, or from accumulations on annuity, pension and insurance funds. [2]For comparative purposes figures may differ from those previously reported to reflec changes in accounting during 1967-68. Figures are rounded and may not add to totals. [3]March includes supplementary payments arising from the closing of th accounts. **Sources: The Canada Gazette and Dept. of Finance.**

Note: The monthly data do not add to the annual totals which include supplementary payments arising from the closing of the accounts. [1] This statement does not include any disbursements other than regular budgetary expenditures. Excluded, for example, are all government outlays arising from increases in loans, advances and investments. [2] Under the Technical and Vocational Training Assistance Act. [3] These payments have been transferred under post-secondary education payments to provinces. [4] Government contributions under the Hospital Insurance and Diagnostic Services Act. [5] Includes treatment and rehabilitation services.
